The Secret School Whitley Strieber, 1997 We forget so much of childhood but why And why does at least some of it seem like such an important loss In this ground breaking book Strieber explores the strangeness of childhood and posits that the essential innocence of children is unearthly and that this must be because of alien visitation and education in our early years He presents an argument using his own research and experiences of alien visitation to support his theory that we are being invaded by alien communities from other planets which are essentially good and that they leave us when we become adults leaving us with a constant sense of their missing presence The Secret School Whitley Strieber, 1997-10-08 Oxford Handbook of Millennialism Catherine Wessinger, 2016-07 Seventh Day Adventists Melanesian cargo cults David Koresh's Branch Davidians and the Raelian UFO religion would seem to have little in common What these groups share however is a millennial orientation the audacious human hope for a collective salvation which may be either heavenly or earthly The Oxford Handbook of Millennialism offers readers an in depth look at both the theoretical underpinnings of the study of millennialism and its many manifestations across history and cultures The Stargate Conspiracy Lynn Picknett, 2001-09-01 In recent years alternative historians have gained remarkable insight into the mysteries of ancient Egypt but according to Lynn Picknett and Clive Prince their discoveries tie into a dangerous conspiracy nearly fifty years in the making At the center of this conspiracy is a group of respected powerful individuals who believe that the ancient Egyptian gods are really extraterrestrials who will soon return to earth The conspirators have intimate and exclusive knowledge of this momentous second coming but they insist on keeping it to themselves What could be the purpose of such a conspiracy Why are the conspirators so desperate to keep their information a secret And what does it mean for mankind In this riveting well researched book Picknett and Price offer compelling evidence that the conspiracy exists and expose the insidious motivations of the individuals and organizations behind it

Brainwashing David Seed,2004 An examination of the literary and cinematic representations of brainwashing during the Cold War era CIA operative who was a tireless campaigner against communism it took hold quickly and became a means to articulate fears of totalitarian tendencies in American life David Seed traces the assimilation of the notion of brainwashing into science fiction political commentary and conspiracy narratives of the Cold War era He demonstrates how these works grew out of a context of political and socail events and how they express the anxieties of the time The Manchurian Candidate Seed provides new interpretations of writers such as Orwell and Burroughs within the history of psychological manipulation for political purposes using declassified and other documents to contextualise the material he explores the shifting view points of how brainwashing is represented changing from an external threat to American values to an internal threat against

**Epilepsy** Jeannette Stirling, 2010-04-26 At least 50 million people worldwide have epilepsy Representing Epilepsy the latest volume in LUP's acclaimed Representations series seeks to understand the epileptic body as a literary or figurative device intelligible beyond a medical framework Jeannette Stirling argues that neurological discourse from the late nineteenth century through to the mid twentieth century is as much forged by the cultural conditions and representational politics of the times as it is by the science of western medicine Along the way she explores narratives of epilepsy depicting ideas of social disorder tainted bloodlines sexual deviance spiritualism and criminality in works as diverse as David Copperfield and The X Files This path breaking book will be required reading for cultural disability studies scholars and for anyone seeking greater understanding of this common condition Representing Epilepsy offers a clever exploration of the cultural history of this condition based on an effective interdisciplinary approach It will be of particular interest to scholars and students in the field of Medical Humanities as well as to all those involved in the care of people with epilepsy who wish to improve their understanding of the socio cultural repercussions of the condition Maria Vaccarella King s College London Hair of the Alien Bill Chalker, 2005-08-19 The shocking true story of a case unlike any other in the annals of UFO investigation DNA research or alien abduction July 23 1992 In Sydney Australia twenty eight year old Peter Khoury was awoken by what appeared to be two females both striking and unearthly kneeling on his bed What transpired between them was a physical assault as bizarre and disorienting as it was unnatural Then as guickly as they had arrived they vanished Khoury had become one of a legion of alien abductees with inexplicable experiences but this particular incident stood apart from all the others This time there was evidence two strands of white blond hair from one of the females Khoury's case would result in the very first forensic DNA analysis of alien abduction evidence and revealed an extraordinary biological anomaly one genetically close to human vet almost impossibly far from the human mainstream A gripping account of one of the great mysteries of our time Hair of the Alien brings us closer than ever before to understanding our past our origings and our place in the universe

The Super Natural Whitley Strieber, Jeffrey J. Kripal, 2016-02-02 Two of todays maverick authors on anomalous experience present a perception altering and intellectually thrilling analysis of why the paranormal is real but radically different from what is conventionally understood Whitley Strieber Communion and Jeffrey J Kripal J Newton Rayzor professor of religion at Rice University team up on this unprecedented and intellectually vibrant new framing of inexplicable events and experiences Rather than merely document the anomalous these authors one the man who popularized alien abduction and the other a renowned scholar and renegade advocate for including the paranormal in religious studies The New York Times deliver a fast paced and exhilarating study of why the supernatural is neither fantasy nor fiction but a vital and authentic aspect of life Their suggestion That all kinds of impossible things from extra dimensional beings to bilocation to bumps in the night are not impossible at all rather they are a part of our natural world But this natural world is immeasurably more weird more wonderful and probably more populated than we have so far imagined with our current categories and cultures which

are what really make these things seem impossible The Super Natural considers that the natural world is actually a super natural world and all we have to do to see this is to change the lenses through which we are looking at it and the languages through which we are presently limiting it In short The extraordinary exists if we know how to look at and think about it
