that some ingredients complement other ingredients. In other words, some ingredients especially strengthen health benefits of other ingredients as a result of biochemical interactions between them. Since knowledge about such combinations of ingredients is useful in cooking, other foods I also decided to include the information as well. The ten recipes for fusion foods, most of which are combinations of Korean foods and Western foods, are not only based on common ingredients but also very easy to follow. The page next to each recipe includes information about health benefits of three selected ingredients. In addition to individual explanations, biochemical analyses about interactions between two ingredients are also provided below each explanation. I hope my analytical studies will help those who are also interested in health effects of ingredients and biochemical mechanisms in cooking.
