Man vs. Machine Karsten Müller, Jonathan Schaeffer, 2018-10-30 Man vs Machine Technology continues to advance at a rapid pace. It may sound quaint today but not so long ago computers battled humans for supremacy at the game of chess. The challenge of building a computer program capable of defeating the best of human kind at chess was one of the original grand challenges of the fledgling field of artificial intelligence. On one side were dedicated scientists and hobbyists who invested decades of effort developing the software and hardware technology on the other side were incredibly talented humans with only their determination and preparation to withstand the onslaught of technology. The man versus machine battle in chess is a landmark in the history of technology. There are numerous books that document the technical aspects of this epic story. The human side is not often told. Few chess players are inclined to write about their man machine encounters other than annotating the games played. This book brings the two sides together. It tells the stories of many of the key scientists and chess players that participated in a 50 year research project to advance the understanding of computing technology. Grandmaster Karsten Müller and Professor Jonathan Schaeffer have managed to describe the fascinating history of the unequal fight of man against machine in an entertaining and instructive way. It evoked pleasant and not so pleasant memories of my own fights against the monsters. I hope that their work gives you as much pleasure as it has given me. From the Foreword by Vladimir Kramnik 14th World Chess Champion

Artificial Beings Jacques Pitrat, 2013-03-01 It is almost universally agreed that consciousness and possession of a conscience are essential characteristics of human intelligence. While some believe it to be impossible to create artificial beings possessing these traits and conclude that ultimate major goal of Artificial Intelligence is hopeless this book demonstrates that not only is it possible to create entities with capabilities in both areas but that they demonstrate them in ways different from our own thereby showing a new kind of consciousness. This latter characteristic affords such entities performance beyond the reach of humans not for lack of intelligence but because human intelligence depends on networks of neurons which impose processing restrictions which do not apply to computers. At the beginning of the investigation of the creation of an artificial being the main goal was not to study the possibility of whether a conscious machine would possess a conscience. However experimental data indicate that many characteristics implemented to improve efficiency in such systems are linked to these capacities. This implies that when they are present it is because they are essential to the desired performance improvement. Moreover since the goal is not to imitate human behavior some of these

structural characteristics are different from those displayed by the neurons of the human brain suggesting that we are at the threshold of a new scientific field artificial cognition which formalizes methods for giving cognitive capabilities to artificial entities through the full use of the computational power of machines *Mysteries and Secrets: The 16-Book Complete Codex* Patricia Fanthorpe, Lionel Fanthorpe, 2014-11-12 This special 16 book bundle collects fearless investigations into the paranormal from the pens of Lionel and Patricia Fanthorpe who for several decades been researching and writing about ancient and eternal mysteries Their entertaining and thought provoking works span numerous topics from numerology freemasonry voodoo satanism and witchcraft to the very nature of death and time Additionally they have produced numerous volumes examining the great unexplained mysteries and places of history including The Bible European castles strange murders arcane objects of power the mysterious depths of the sea and remarkable people Take a strange and beautiful trip to the mystical side of life in this special set Includes Death Mysteries and Secrets of Numerology Mysteries and Secrets of the Masons Mysteries and Secrets of the Templars Mysteries and Secrets of Time Mysteries and Secrets of Voodoo Santeria and Obeah Satanism and Demonology Secrets of the World s Undiscovered Treasures The Big Book of Mysteries The Oak Island Mystery The World s Greatest Unsolved Mysteries The World s Most Mysterious Castles The World s Most Mysterious Murders The World s Most Mysterious Objects The World s Most Mysterious People Unsolved Mysteries of the Sea
