Setting European Community Priorities 1991-92:

Europe and the Recognition of New States in Yugoslavia Richard Caplan, 2005-09-01 Europe's recognition of new states in Yugoslavia remains one of the most controversial episodes in the Yugoslav crisis. Richard Caplan offers a detailed narrative of events, exploring the highly assertive role that Germany played in the episode, the reputedly catastrophic consequences of recognition for Bosnia Herzegovina in particular, and the radical departure from customary state practice represented by the EC's use of political criteria as the basis of recognition. The book examines the strategic logic and consequences of the EC's actions but also explores the wider implications, offering insights into European security policy at the end of the Cold War, the relationship of international law to international relations, and the management of ethnic conflict. The significance of this book extends well beyond Yugoslavia, as policymakers continue to wrestle with the challenges posed by violent conflict associated with state fragmentation.

Setting European Community Priorities, 1991-92 Peter Ludlow, 1991. Begins an annual series by the Centre for European Policy Studies, Brussels, as a prospective complement to its retrospective series. The annual review of EC affairs analyzes such topics as whether the lire or the peseta is overvalued, how to measure the progress of convergence and competition policies. No index. Surveying the European Union's evolution from the Rome Treaty to the present, *The Emerging European Union* captures the full story of Europe's ongoing integration, its changing identity, and its increasing importance as a global actor in the 21st Century. This text's concise but comprehensive overview of the history, institutions, and policies of the European Union lays out the major elements of the European integration and explains how the European Union functions, emphasizing competing intergovernmental and supranational forces. *The Emerging European Union* explains the origins and future of the European Union as well as its political uniqueness.

International Economic Policy in the 1990s William R. Cline, 1994. These eight lectures by noted economist William Cline provide a clear and concise account of some of the most important macroeconomic issues facing the world economy. Designed for the nonspecialist but a source of fresh insight for the specialist as well, the lectures synthesize the major trends in international economic policy for the 1990s. Major themes include domestic and international economic stagnation, adjustment to external imbalances, trade policy, including case studies of Japan and NAFTA, the debt crisis, reform in former communist states, the economic future of Europe, and environmental policy. Cline, who has made important contributions to the topics addressed, reviews the forces that have contributed to policy problems and then evaluates the prospects for resolution. He shows how an understanding of economics can help break down many policy problems into simple fundamentals and how empirical evidence is the acid test of any policy theory. Cline's coverage of many of today's hot public policy issues is unique, both in its accessibility and in its broadbrush approach to a set of concerns of immediate interest to economists, policymakers, and others concerned with international economic policy.

European Research Reloaded: Cooperation and Integration among Europeanized States Ronald Holzhaacker, Markus Haverland, 2006-09-01 The Three Waves of European Research European cooperation and integration has continued to progress forward over the past five decades with an ever deepening impact on the member states The first wave of research into these processes concerned European integration the process of institution building and policy developments at the European Union EU level The second wave on Europeanization used integration as an explanatory factor in understanding domestic political change and continuity related to the EU What is now necessary is to link our understanding of these bottom up and top down processes of integration and Europeanization in the EU This book argues that a third wave of research on the EU is needed to adequately understand the increased interconnectedness between the European and national political levels We posit that this third wave should be sensitive to the temporal dimension of European integration and Europeanization In particular we seek to link the processes of European integration and Europeanization in a new way by asking the question how has Europeanization affected current modes of integration and cooperation in the EU Part I Europeanization of the Member States Preparing the ground for the third wave the first part of the book concerns Europeanization In order to fully understand the feedback of Europeanization on cooperation and integration it is important to analyze how European integration has had an impact on member states in the first place in particular indirectly beyond the direct mechanism of compliance with European policies

Monetary and Exchange Rate Arrangements for Nafta Mr. Tamim Bayoumi, Mr. Barry J. Eichengreen, 1993-03-01 This paper considers the extent to which the North American Free Trade Area NAFTA meets the criteria for a common currency area NAFTA is compared with the EC a regional grouping for which initial plans for a monetary union are already in place Most of the anticipated benefits from a monetary union in the EC apply with equal force to NAFTA However because the underlying disturbances are more diverse across members of NAFTA the costs of abandoning the exchange rate instrument are likely to be higher This is particularly true when NAFTA is compared to the EC's continental core

European Responses to Globalization and Financial Market Integration A. Verdun, 2000-02-17 This book investigates the perceptions of political actors towards the creation of Economic and Monetary Union (EMU) in Europe. The research is largely based on personal interviews conducted with key informants in central banks, finance ministries, employers' organizations and trade unions in Britain, France and Germany. It examines why actors perceived EMU to serve or frustrate their interests. It concludes that actors favoured EMU for a variety of reasons. The book contributes to the literature of European integration and incorporates economic, political and historical facts.

International Food Safety Handbook Kees Van der

Heijden, 2019-07-05 Covers all aspects of food safety: science, regulation and labeling requirements, integrating major developments in the fields of toxicology, analytical chemistry, microbiology, hygiene and nutrition. Designed to be a reference that bridges the gaps between science, regulation and control of food safety. While this might have been a rather ambitious aim in putting together this book, the editors have certainly succeeded in gathering a group of experts from industry, government agencies, academia, consumer groups and the media whose knowledge and expertise reflect the complex and multisectoral, multidisciplinary nature of food safety.

Health Care and Cost Containment in the European Union Elias Mossialos, Julian Le Grand, 2019-05-20 First published in 1999, this volume aims to describe and analyse the experience of cost containment in Europe over the last fifteen years in order to understand that experience and to determine as best we can which methods were successful and which were not. Part I provides an overview of healthcare in the European Union, an overview of recent expenditure trends. Part II complements the first, examining in detail cost containment policies in each EU Member State. The country-based chapters refer to developments up to mid 1997.

Crossing the Atlantic Patrick M. Crowley, 2017-11-30 Given the legal, political, economic and social similarities that exist, comparisons between the European Union (EU) and Canada can prove instructive. This volume introduces the rationale for comparing Canada and the EU and reviews the political initiatives that have been undertaken to forge links between the two. Taking the political and economic structure used by the EU, it compares this structure to the Canadian model at both the

federal supranational level and the local government level Using various disciplinary approaches and case studies specific policy areas are used to illustrate these comparisons and several of the papers in the collection extend these comparisons to the NAFTA level A highly useful reference tool Crossing the Atlantic will intrigue and inform an interdisciplinary and inter regional studies audience *A Green Dimension for the European Community* David Judge, 2014-03-05 First Published in 1993 A Green Dimension for the European Community is a collection of nine essays from a range of contributors separated into two parts political issues and processes The theme discusses the idea that the introduction of the Single Market marks a particularly appropriate time to consider the political issues and processes affecting environmental policy in the European Community EC The contributors argue that at such a time and in the face of such threats an understanding of the green dimension of the EC is more than an academic exercise This title concludes with a comprehensive index *Cumulated Index Medicus* ,1989
