Long March Of French Universities:

The Long March of French Universities Christine Musselin, 2013-02-01 The main point of this book is to argue that French universities experienced a quiet but important change during the last decade which allowed them to become pertinent and more autonomous actors within the French university system [The Long March of French Universities](#)

Christine Musselin, 2004 **The Long March of the French Left** R.W. Johnson, 1981-03-19 *The University under Pressure* Elizabeth Popp Berman, Catherine Paradeise, 2016-02-26 Universities are under pressure Their resource environment is evolving demands for accountability have increased and demographic shifts are changing higher educational needs This volume provides a cross national picture of how the university as an organization is reacting to adapting to and threatened by a period of intense pressure **European Integration and the Governance of Higher Education and Research**

Alberto Amaral, Guy Neave, Christine Musselin, Peter Maassen, 2009-10-03 The high level Douro seminars are now a well established tradition in the annual activities promoted by Hedda a European consortium of nine centres and institutes devoted to research on higher education and CIPES its Portuguese associated centre At the seminars each member of a small group of invited researchers presents and discusses an original research based paper that is revised afterwards taking into account the comments of the participating colleagues The revised papers form the basis for the annual thematic book published by Springer in the book series called Higher Education Dynamics HEDY Paying tribute to the regularity of the seminars it was decided that the volumes originating from the initiative would be collected in a series in the series called the Douro Series Previous seminars were dedicated to in depth analyses of different aspects of higher education systems and institutions including institutional governance the emergence of managerialism markets as instruments of public policy cost sharing and accessibility of students to higher education and developments in quality assurance The present volume aims at analysing the change process which the European university is undergoing as a consequence of European integration efforts In the case of higher education these have materialised amongst other things in the implementation of the Bologna process while the Lisbon summit also has important consequences for the university In March 2000 the Lisbon European Council set the goal for the EU to become the most competitive and dynamic knowledge based society in the world by 2010 *The Market for Academics* Christine Musselin, 2009-12-04 This book addresses academic labor markets in three countries France Germany and the United States The management of faculty careers is a critical issue in university autonomy and in many countries recent reforms have increasingly addressed this area Musselin's exhaustive empirical research on academic job hiring practices and faculty career patterns included over 200 interviews with faculty members and administrators concerning two disciplines history and math Each of the countries has very different historical traditions with regard to how peers recruit their colleagues within the academy Using what is known as an economics of quality comparative approach she sheds new light on faculty worklife The author's focus on the criteria of evaluation in academic hiring decisions is a unique

contribution and one that should stimulate the current debates on higher education reforms Modern France Michael F. ideologies and practices are addressed In the same vein this book also places emphasis on the importance of institutional quality assurance mechanisms accreditation learning outcomes and multicultural connectivity through an inclusive curriculum Lastly in providing thorough strategies for comprehensive internationalisation of higher education this book provides pertinent discussions on the sustainable funding models for the HEIs repositioning the higher education sector as a vibrant export sector reforms in higher education governance in HEIs entrepreneurship in higher education and competition in higher education
