## **Longitudinal Research In Alcoholism:**

Longitudinal Research in Alcoholism K.T. van Dusen, Donald W. Goodwin, Sarnoff A. Mednick, 2012-12-06 Alcohol Use Across the Life Course Kaye Middleton Fillmore, Ontario. Addiction Research Foundation, 1988 The World Health Organization commissioned this review of longitudinal studies of drinking patterns and alcohol related problems to evaluate the contributions, needs and limitations of longitudinal research. The review also develops guidelines and recommendations for future longitudinal studies of human alcohol use in different regions of the world. In addition, it identifies the lack of cross study comparison to epidemiological description and demonstrates ways in which individual longitudinal studies can contribute to epidemiological description across historical periods, cultures and age cohorts. It then examines three diverse explanations of longitudinal drinking patterns and problems from the perspectives of biology, sociology and psychology, addressing how concretely replicated they are and how they are confounded by methodological problems. Finally, it develops strategies for future research.

*Quality of Life in Alcohol Dependents* John Foster, 2007. There has been a paucity of studies that have investigated the quality of life (QoL) of alcohol dependent individuals. Intuitively, because there are deleterious physical and psychological health consequences resulting from alcohol consumption, it is possible to put forward the hypothesis that not relapsing to heavy drinking will result in an improved QoL, and in contrast, that the consequences of relapsing to heavy drinking will be a deterioration in QoL. The present book tests this hypothesis and also seeks to ascertain those variables that are predictors of outcome. In addition, it examines the role played by sociodemographic and other confounding factors in the QoL of alcohol dependent individuals.

Research Advances in Alcohol and Drug Problems H.M. Annis, H.D. Cappell, F.B. Glaser, M.S. Goodstadt, L.T. Kozlowski, 2013-11-11. This is the tenth volume in the Research Advances series and the seventh published by Plenum Press. Volume 10 is another omnibus volume providing specialized and advanced reviews in a number of areas related to the use of alcohol, illicit drugs and tobacco. We include also a brief history of the Center for Alcohol Studies that gives Mark Keller's unique perspective on this noted institution. Two of the chapters are decidedly longer than the others; very long chapters have appeared occasionally in the past and we think that it is one of the strengths of the series that we are able to accommodate such reviews. Again, the editorial board has changed. After several years of service, Reginald G. Smart has stepped down. New to the board are Helen M. Annis, Michael S. Goodstadt, Lynn T. Kozlowski and Evelyn R. Vingilis. This is likely to be the sole volume for which Goodstadt is on the board since before completion of this volume he moved from the Addiction Research Foundation to the Center for Alcohol Studies, Rutgers University.

The Use of Longitudinal Studies in Alcoholism Research Genevieve Knupfer, 1967 **Alcohol Research & Health**, 2010

Current Issues in Alcohol/Drug Studies Edith S. Gombert, 2019-05-23. This provocative and controversial book challenges a number of widely held ideas in the alcohol/drug field by critically evaluating the bases of these ideas. The field of alcohol/drug studies is fraught with conflict and controversy, and each generation of researchers and practitioners

seems to have its own special areas of conflict In this new volume experts focus on a number of important issues of current interest and controversy Is alcoholism a disease or is it not Should federal bans on drugs like heroin and cocaine be removed and will that solve modify or exacerbate the problem Can the risk for alcoholism really be predicted Professionals from a very wide variety of disciplines medicine and biochemistry psychiatry and psychology philosophy anthropology law social work and journalism present their very differing points of view on the perception of alcoholism as a disease and on public policy issues like proposed legislative controls over alcoholic beverages Current Issues in Alcohol Drug Studies touches upon a number of questions that will be of interest both to people in alcohol drug research and in alcohol drug treatment and prevention Because it will undoubtedly stimulate further investigation and debate researchers and policymakers will also find it useful

*Biomedical Index to PHS-supported Research: pt. A. Subject access A-H*, 1994 *Current Issues in Alcohol/drug Studies*, 1989 In this new volume experts focus on a number of important issues of current interest and controversy Is alcoholism a disease or is it not Should federal bans on drugs like heroin and cocaine be removed and will that solve modify or exacerbate the problem Can the risk for alcoholism really be predicted Professionals from a very wide variety of disciplines medicine and biochemistry psychiatry and psychology philosophy anthropology law social work and journalism present their very differing points of view on the perception of alcoholism as a disease and on public policy issues like proposed legislative controls over alcoholic beverages Research Advances in Alcohol and Drug Problems Reginald G. Smart, Howard D. Cappell, Frederick B Glaser, Yedy Israel, Harold Kalant, Robert E. Popham, Wolfgang Schmidt, Edward M. Sellers, 2013-03-13 This volume is the eighth in the Research Advances Series and the fifth published by Plenum Press The purpose of the series is to review new work in rapidly changing fields We do not expect reviews to cover the whole field of work on alcoholism and addiction Nor do we expect that they will be like annual reviews covering all work in a delimited field Our reviews are designed to explore only the most exciting parts of the total field and to focus on conclusions that can be made about them The series publishes one volume each year Volume 8 is an omnibus rather than a theme volume in that a wide range of topics is covered including research on alcohol opiates and tobacco As usual the greater emphasis is on alcohol research reflecting the importance of the problem and the volume of work to be reviewed With Volume 8 come some changes in the Editorial Board It will be the last volume in the series for

Robert E Popham who has resigned from the Board He has been with the series since its inception and has contributed a great deal to its development The members of the Board are grateful for his help We are adding two new members Dr Howard Cappell whose field is experimental psychology and Dr Edward M Sellers in clinical medicine and pharmacology

**Drug and Alcohol Use** Stanley Einstein,1989-01-01 This book is the outcome of the First International Congress on Drugs and Alcohol to be held in Israel Both the conference and this volume grew out of the need to overcome the specious man made barriers which continue to separate intervention plans and efforts in the broad field of substance use and misuse This need demands that all of us become aware not only of the differences which may separate our concerns but also of the similarities in our goals and endeavors We are obligated to draw together toward a common effort for the common good The conference was designed to facilitate the exploration of generic issues This volume is designed to document a variety of factors which are basic to the defining selection planning implementation and evaluation of substance use and misuse intervention This book is not a traditional proceedings volume Because the needs of a listening audience are quite different from those of the solitary reader and the roles of a workshop or plenary session participant are also dissimilar from those of the reader not all of the Congress presentations are included and the articles that are included have undergone major revisions Current intervention needs and options demand a broad spectrum of clearly defined roles for all who are or should be involved Hence these issues among others served as guidelines in the preparation of the revised articles     *Research Grants Index* National Institutes of Health (U.S.).
