Abstract

We examine the determinants of migrants' choices of destination, employment, and remittances from one of the poorest marginal dry areas in Syria. Qualitative and econometric analysis of cross-sectional data indicates that migrants' choices depend mainly on individual, household, and community characteristics and also on availability of opportunities. The main factors affecting the choice of destination and employment are the sending area, age, and sex of migrants, while the educational level had no significant effect in both cases. The larger the endowments of migrants' households, the higher the remittances sent back home to preserve households' assets in marginal dry areas.

1 Introduction

The wide range of literature has described the differences between migrants and non-migrants. According to the paper on New Economics of Labor Migration (NELM) published by Stark and Bloom (1985), migration is a family arrangement, migrants are chosen according to specific characteristics, they are usually younger and more educated (Stark and Taylor 1989), and it is more likely that international migrants would be males (Massey and Zenteno 1999). Also, having a spouse in the home country increases migrants' likelihood of return (Constant and Massey 2002).

Migration is not a random process; people who migrate usually have different individual, household, and community characteristics than those left behind (Eora and Kios 2001; Moss and Taylor 2006). Several theories tried to explain the migration phenomenon. Taylor and Martin (2001) stated that classical and neoclassical theories—despite their contribution to explain this phenomenon from a macroeconomic perspective—could not explain the migration selectivity process (i.e., why do some people migrate while others do not?). Moreover, the theory stresses that migrants' destinations as well as their probabilities of getting work are a function of their individual characteristics.

According to the NELM, migration consists of a household's strategy that aims at mitigating risks and facing market failures (namely credit and labor markets) in developing countries. Thus, migration is a solution. Remittances sent home by migrants help household to diversify and improve their production systems and thus to minimize risks.

Marginal Migrants:

Migrants and Markets Holger Kolb, Henrik Egbert, 2008 Over the course of their interaction economics and migration research have treated each other with mutual indifference When migration research attempted to overstretch its bounds economics reduced its analytical scope to those areas that originally seemed to belong to the genuine economic sphere This volume considers eleven case studies that aim to overcome the artificial barrier between the two disciplines by applying the economic method to migratory phenomena utilizing economic theories in order to explain migratory patterns and regarding the structure and development of markets as crucial to the shaping of population stocks and the flow of migrants

American Immigration Policy Steven G. Koven, Frank Götzke, 2010-08-09 Collaboration can be a painful process especially between authors of different disciplines This book is an outgrowth of discussions between a Political Scientist and Economists at the School of Urban and Public Affairs University of Louisville The Economics perspective is found in Chapter 3 and was largely written by Frank Götzke The Political Science oriented review Chapters 2 and 6 as well as all the case studies were largely provided by Steven Koven Most of the book but especially Chapters 4 5 and 7 evolved as a consequence of conversations between the two authors We believe the product of two disciplinary approaches has produced a collective outcome that is greater than the sum of individual parts would have been In this book we have attempted to combine the analytical empirical historical political and economics approaches Chapter 3 presents an analytical model based on economics Chapters 4 and 5 summarize empirical census data related to immigrants and Chapter 6 reviews the legislative and political history of immigration

Marginality, Migration and Education Winniefridah Matsa, 2020-12-21 This book provides a missing link between marginality migration and education in Zimbabwe focusing on the educational experiences of migrants children in an effort to influence government policies concerning migrant parents and their left behind children While there is a large body of knowledge on the education of children of immigrants in destination countries this book aims to fill in the gap by addressing the children who do not migrate with their parents Through this unique approach the book examines the education statuses of these left behind children offering insights into their educational challenges rights and inequities to better inform policy decisions to meet the 2030 education agenda for action established by the United Nations in 2015 The book will of interest and use to governments NGOs teachers and local communities in Africa as a resource to better understand the situation of migrants left behind children as a category of vulnerable children in difficult circumstances

The Workers' State Meets the Market Sarah Cook, Margaret Maurer-Fazio, 2013-10-23 Among the most dramatic changes to affect China in the 1990s is the upsurge in labour mobility and the emergence of a market driven system of labour allocation changes which profoundly affect the working environment and livelihoods of the Chinese people Papers in this collection draw on a wide variety of data sources to analyse key elements of this transformation

The Rights of Immigrant Workers in the European Union Joanna Apap, 2002-09-01 This book is one of the very few studies that evaluates

the evolving policies towards third country nationals residing and working in the European Union EU Other studies have analysed the existing legal framework of citizenship and migrants rights in the EU and the flow of migrants into the Community However much less comparative research has been carried out about the actual position and the practice of migrants rights in the receiving countries in the context of an ever integrating EU and the removal of internal borders The focus of this book is on the consequences of the increasing number of Maghreb workers residing in Italy and Spain both for EU policy and with respect to these two countries as relatively new receiving states The book examines What public policy implications does the labour immigration from the Maghreb Countries have for the EU as a supranational Community rather than for the Member states individually To what extent can citizenship rights be extended to third country nationals legally residing in a European Union to make their status as close as possible to that of European citizens

How Labor Migrants Fare Klaus F. Zimmermann, Amelie Constant, 2012-12-06 In the globalized economy labor migration has become of central importance A key issue in the analysis of immigration is how the migrants fare in the economy in which they migrate and how they assimilate towards the behavior of the natives Using data from the United States Canada many European countries Australia and New Zealand the chapters study the developments of earnings employment unemployment self employment occupational choices and educational attainment after migration The book also investigates the role of language in labor market integration and examines the situation of illegal legalized and unwilling migrants Policy effects are also studied Among those are the effects of selection criteria of labor market success and the effects immigrants have on the public sector budget of the receiving country Hence the book provides a broad picture of the performance of migrants

Memories of Jesus Halvor Moxnes, 2021-02-09 This is a different book about Jesus It does not study the Gospels as sources for the historical Jesus but reads them as memories about Jesus each Gospel with its characteristic picture of Jesus The book traces the transmission and growth of memories of Jesus in various contexts and in different historical periods It also introduces readers to the little known counterstories to Christian memories in Jewish sources as well as to the rival stories in the Quran A central perspective in the book is the troubling fact that for centuries the memories of Jesus contributed to hate speech against the Jews in Europe The passion narratives in the Gospels put the blame for the death of Jesus upon Jewish leaders and these stories were transmitted across the centuries as historical truth Memories of Jesus have served as identity markers not only for churches but also for societies and countries The last chapters focus on how the memories of Jesus have played an important role in supporting the identity of oppressed and marginalized groups in particular in the contemporary United States

The New Immigrant in the American Economy Marcelo M.
