Fradin,1997 Learn the astonishing story of the eight year old Spanish girl who in 1879 discovered the first known prehistoric cave paintings **Maria Sanz de Sautuola** Dennis B. Fradin,2007 The true story of Mar a de Sautuola an eight year old Spanish girl who discovered the first known prehistoric cave paintings in 1879 while working with her father in Altamira Cave *Mind in the Cave: Consciousness and the Origins of Art* David Lewis-Williams,2004-04-17 The breathtakingly beautiful art created deep inside the caves of western Europe has the power to dazzle even the most jaded observers Emerging from the narrow underground passages into the chambers of caves such as Lascaux Chauvet and Altamira visitors are confronted with symbols patterns and depictions of bison woolly mammoths ibexes and other animals Since its discovery cave art has provoked great curiosity about why it appeared when and where it did how it was made and what it meant to the communities that created it David Lewis Williams proposes that the explanation for this lies in the evolution of the human mind Cro Magnons unlike the Neanderthals possessed a more advanced neurological makeup that enabled them to experience shamanistic trances and vivid mental imagery It became important for people to fix or paint these images on cave walls which they perceived as the membrane between their world and the spirit world from which the visions came Over time new social distinctions developed as individuals exploited their hallucinations for personal advancement and the first truly modern society emerged Illuminating glimpses into the ancient mind are skillfully interwoven here with the still evolving story of modern day cave discoveries and research The Mind in the Cave is a superb piece of detective work casting light on the darkest mysteries of our earliest ancestors while strengthening our wonder at their aesthetic achievements *Unbound* Richard L Currier,2017-08-08 Like Guns Germs and Steel a work of breathtaking sweep and originality that reinterprets the human story Although we usually think of technology as something unique to modern times our ancestors began to create the first technologies millions of years ago in the form of prehistoric tools and weapons Over time eight key technologies gradually freed us from the limitations of our animal origins The fabrication of weapons the mastery of fire and the technologies of clothing and shelter radically restructured the human body enabling us to walk upright shed our body hair and migrate out of tropical Africa Symbolic communication transformed human evolution from a slow biological process into a fast cultural process The invention of agriculture revolutionized the relationship between humanity and the environment and the technologies of interaction led to the birth of civilization Precision machinery spawned the industrial revolution and the rise of nation states and in the next metamorphosis digital technologies may well unite all of humanity for the benefit of future generations Synthesizing the findings of primatology paleontology archeology history and anthropology Richard Currier reinterprets and retells the modern narrative of human evolution that began with the discovery of Lucy and other Australopithecus fossils But the same forces that allowed us to integrate technology into every aspect of our daily lives have also brought us to the brink of planetary catastrophe Unbound

explains both how we got here and how human society must be transformed again to achieve a sustainable future Technology The deliberate modification of any natural object or substance with forethought to achieve a specific end or to serve a specific purpose
