Market Control and Planning in Communist China Dwight H. Perkins,1968 **The Market Mechanism and Economic Reforms in China** William Byrd,2019-07-04 This theoretical and empirical study of market oriented reforms in Chinese industry since the late 1970s focuses on the expansion of the market mechanism in the allocation of industrial products and the concurrent decline of directive planning a strategy that is a crucial component of the ambitious overall reform package that Chinese reformers are trying to implement The expanding role of Chinese industrial goods has had major implications for the functioning and importance of planning which the author argues has become largely irrelevant in terms of direct control over short term allocation **Market Control Abd Planning in Communist China** Dwight H. Perkins,1968

An Economic Profile of Mainland China United States. Congress. Joint Economic Committee,1967 **From Mao to Market** Andrew H. Wedeman,2003-07-10 Andrew Wedemen argues that China succeeded in moving from a Maoist command economy to a market economy because the central government failed to prevent local governments from forcing prices to market levels Having partially decontrolled the economy in the early 1980s economic reformers balked at price reform opting instead for a hybrid system wherein commodities had two prices one fixed and one floating Depressed fixed prices led to resource wars as localities battled each other for control over undervalued commodities while inflated consumer goods prices fuelled a headlong investment boom that saturated markets and led to the erection of import barriers Although local rent seeking and protectionism appeared to carve up the economy in reality they had not only pushed prices to market levels and cleared the way for sweeping reforms in the 1980s they had also pushed China past the pitfalls of reform that entrapped other socialist economies **Economic Growth and Distribution in China** Nicholas R. Lardy,1978-08-31 This study focuses on the China s leadership s attempt to improve economic efficiency by decentralizing economic management
