L Robert Escarpit,2020-10-26 No detailed description available for L      **Sensibility, Reading and Illustration** Ann Lewis,2017-12-02 Eighteenth century sensibility has always been controversial In fact the term itself refers to complex forms of physical and emotional responsiveness and Lewis s study investigates the fictional exploration of various key problems of sentimental response that were at the heart of eighteenth century moral epistemological and aesthetic debates These are analysed in conjunction with some of the actual often emotional responses that the term its fictions and images have provoked through time including an indispensable survey of the varying construction of sensibility as an object of study and the polemics subtending its definition The verbal evocation of the visual in the form of spectacles and signs was understood in the eighteenth century as having an especially powerful impact Lewis provides a new reading of the theme of sensibility by analysing the textual images in three best selling novels from the mid century Graffigny s *Lettres d une Peruvienne* Marivaux s *La Vie de Marianne* and Rousseau s *Julie* The examination of a largely neglected corpus of illustrations understood as

readings of each text provides striking new evidence of the complexity thematic richness and duplicity of these spectacles whose power to provoke different reactions is perhaps their most interesting characteristic Notre litterature etudiee dans les textes Marcel Braunschvig,1921 **The Enlightenment and the Intellectual Foundations of Modern Culture** Louis Dupre,2008-10-01 The prestige of the Enlightenment has declined in recent years Many consider its thinking abstract its art and poetry uninspiring and the assertion that it introduced a new age of freedom and progress after centuries of darkness and superstition presumptuous In this book an eminent scholar of modern culture shows that the Enlightenment was a more complex phenomenon than most of its detractors and advocates assume It includes rationalist as well as antirationalist tendencies a critique of traditional morality and religion as well as an attempt to establish them on new foundations even the beginning of a moral renewal and a spiritual revival The Enlightenment s critique of tradition was a necessary consequence of the fundamental modern principle that we humans are solely responsible for the course of history Hence we can accept no belief no authority no institutions that are not in some way justified This foundation for better or for worse determined the course of the following centuries Despite contemporary reactions against it the Enlightenment continues to shape our own time and still distinguishes Western culture from any other
