This landmark open access book unveils the history of defending Australia's natural environment and examines the subject's legal and political contexts from the birth of the nation in 1901 until the advent of the so-called modern era of environmental regulation in the late 1960s. It rejects the mythology that Australia lacked environmental law before the late 1960s, revealing how many of today's environmental laws from pollution control to nature conservation emerged from precedents or events much earlier in the 20th century. This history however reveals a discrepancy between lawmakers' greater efficacy to exploit rather than protect the environment, a discrepancy that grew as nature's backlash intensified in a rapidly degrading continent colonised to build the Australian nation. In exploring these dynamics the book offers a rich tapestry of case studies illustrated with historic photographs that show the origins of Australia's environmental laws and how they borrowed from international precedents or furnished lessons for other nations. Through its multi-disciplinary enquiry the book offers scholars and students of environmental law, legal history and the environmental humanities a unique story about the failures and successes in the making of environmental law. The ebook editions of this book are available open access under a CC BY-NC-ND 4.0 licence on bloomsburycollections.com.

Autumn Leaves Samuel Jackson Gardner, 1865 **Glimpses of Paradise** Penny Olsen, 2007 The history of the Paradise Parrot from its discovery in the 1800s to its extinction in the 1920s and how claims of sightings have continued to the present day Of Marsupials and Men Alistair Paton, 2022-07-05 A rollicking history of Australia's amateur naturalists from settlement to the present. A fascinating history of Australia's wildlife and the wilder men and women who shot, studied and saved it. Compelling and entertaining. David Hunt. *Of Marsupials and Men* recounts the fascinating and often hilarious history of the men and women who dedicated their lives to understanding Australia's native animals. To the first European colonists Australian wildlife was bewildering. Marsupials and gum trees seemed strange and hostile. Rabbits, sheep and oak trees were familiar and safe. A bustling animal trade soon developed in both directions. Foxes, starlings and other reminders of home were unleashed on the Australian landscape while countless Australian animals found themselves in Europe as stuffed specimens or living curiosities in zoos and private collections. Into this picture stepped a remarkable band of enthusiastic amateurs who were determined to get to know the fauna of the new colony. Equal parts inspiring and outlandish over the next 150 years they would advance scientific understanding and transform public attitudes to Australian wildlife. From the snake men who fearlessly thrust their arms into hollow logs just to see what might happen to the top secret plan to smuggle a platypus to Winston Churchill at the height of World War II these are their stories.
