Quien Dice Who Says:

The Second Time Around □ **Minimalism and L2 Acquisition** Julia Herschensohn, 2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay a relearning of language It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2 Assuming that a syntactic distinction crucial for language and its acquisition is the division between lexical and functional categories it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories It thus supports the availability of UG to the second language learner and the minimalist claim that cross linguistic variation is morpholexical Constructionism the hypothesis of L2A proposed in this account argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions

Evidentiality and Epistemic Modality in Spanish (Semi-)Auxiliaries Bert Cornillie,2008-08-27 This volume presents a systematic and comprehensive analysis of the Spanish evidential semi auxiliaries *parecer* and *resultar* the modal constructions with *amenazar* and *prometer* and the modal auxiliaries *poder* *deber* and *tener que* These verbs have never been considered together in a global approach that transcends the classical verbal periphrases model The book proposes a cognitive functional account of evidentiality and modality in Spanish with special attention to subjectivity and grounding The theoretical reflection relies on empirical evidence of two sorts synchronic and diachronic corpus analyses alternate with tests that measure the semantic and pragmatic compatibility of the evidential and epistemic constructions with specific sentences Following the assumption that linguistic forms are determined by their meaning the array of constructions that characterizes the different verbs justifies their grouping in three pairs of semi auxiliaries *parecer* vs *resultar* *amenazar* vs *prometer* and *poder* vs *deber* *tener que* The distributional differences observed in the corpus are further shown to correlate with different degrees of grammaticalization Primarily intended for scholars working in the field of Spanish functional linguistics the monograph is also relevant for grammaticalization studies and for cognitive semantic research at large Given its combined theoretical and applied character the volume is also of interest to anyone concerned with syntactic processes lexical semantics or the wider area of discourse analysis and pragmatics **Spain, Third Edition** John A.
