Nationalism and Social Policy Daniel Béland, André Lecours, 2008-08-07 Despite the recent proliferation of literature on nationalism and on social policy relatively little has been written to analyse the possible interaction between the two Scholars interested in social citizenship

have indirectly dealt with the interaction between national identity and social programs such as the British NHS but they have seldom examined this connection in reference to nationalism. Specialists of nationalism rarely mention social policy focusing instead on language culture ethnicity and religion. The main objective of this book is to explore the nature of the connection between nationalism and social policy from a comparative and historical perspective. At the theoretical level this analysis will shed new light on a more general issue: the relationships between identity formation territorial politics and social policy. Although this book refers to the experience of many different countries the main cases are three multinational states that is states featuring strong nationalist movements: Canada, Quebec, the United Kingdom, Scotland and Belgium, Flanders. The book looks at the interplay between nationalism and social policy at both the state and sub state levels through a detailed comparison between these three cases. In its concluding chapter the book brings in cases of mono national states i.e. France, Germany, Sweden and the United States to provide broader comparative insight on the meshing of nationalism and social policy. The original theoretical framework for this research is built using insight from selected scholarship on nationalism and on the welfare state.

Contemporary Quebec Michael D. Behiels, Matthew Hayday, 2011-11-30. In the last seventy years Quebec has changed from a society dominated by the social edicts of the Catholic Church and the economic interests of anglophone business leaders to a more secular culture that frequently elects separatist political parties and has developed the most comprehensive welfare state in North America. In *Contemporary Quebec* leading scholars raise provocative questions about the ways in which Quebec has been transformed since the Second World War and offer competing interpretations of the reasons for the province's quiet and radical revolutions.

The New North American Studies Winfried Siemerling, 2005. Winner of the English Book Award Grand Prix du Livre 2006 de la Ville de Sherbrooke. In this original and groundbreaking study Winfried Siemerling examines the complexities of recognition and identity rejecting previous nationalized thinking to approach North American cultural transformations from transnational and interdisciplinary perspectives. Using material from the United States and Canada as case studies and drawing on a wide range of texts and theorists he examines postcoloniality and cultural emergence from the sixties to the present against earlier backgrounds. Siemerling's argument for a retheorization of the field takes on the full history of multiculturalism debates including radical readings of W. E. B. Du Bois and Charles Taylor and their relation to G. W. F. Hegel and challenging many of the models of multiculturalism in use today. Tackling controversial subjects such as identity politics *The New North American Studies* proposes a fresh outlook on the most central issues of North American cultural politics from debates on canon formation to the role of racial and linguistic difference. Concluding with a look at the future of cultural difference Winfried Siemerling's study is an innovative rethinking of the whole field of North American Studies.
