Quine Questions De Mots Questions De Faits:

The Death of Philosophy Isabelle Thomas-Fogiel, 2011 Philosophers debate the death of philosophy as much as they debate the death of God Kant claimed responsibility for both philosophy's beginning and end while Heidegger argued it concluded with Nietzsche In the twentieth century figures as diverse as John Austin and Richard Rorty have proclaimed philosophy's end with some even calling for the advent of postphilosophy In an effort to make sense of these conflicting positions which often say as much about the philosopher as his subject Isabelle Thomas Fogiel undertakes the first systematic treatment of the end of philosophy while also recasting the history of western thought itself Thomas Fogiel begins with postphilosophical claims such as scientism which she reveals to be self refuting for they subsume philosophy into the branches of the natural sciences She discovers similar issues in Rorty's skepticism and strands of continental thought Revisiting the work of late nineteenth and early twentieth century philosophers when the split between analytical and continental philosophy began Thomas Fogiel finds both traditions followed the same path the road of reference which ultimately led to self contradiction This phenomenon whether valorized or condemned has been understood as the death of philosophy Tracing this pattern from Quine to Rorty from Heidegger to Levinas and Habermas Thomas Fogiel reveals the self contradiction at the core of their claims while also carving an alternative path through self reference Trained under the French philosopher Bernard Bourgeois she remakes philosophy in exciting new ways for the twenty first century Quine

Ascent to Truth Paul Gochet, 1986 W van Orman Quine is one of the leading philosophers in America today His thinking however has received little attention from philosophers in continental Europe This book is a systematic and critical account of Quine's philosophy which aims at isolating what is of lasting value in his work Each of his major theses is submitted to a thorough examination both from within and from without his general

standpoint Quine's positions have changed a great deal over the years in response to external criticism and to internal stresses and strains. These changes are described and assessed. Quine's rejection of the analytic synthetic dichotomy is considered in the light of non monotonic logic. The multi-farious versions of his holism are brought together and evaluated. Dummett's objection to the effect that holism is inconsistent with empiricism is refuted. It is argued however that the controversial thesis of the indeterminacy of translation becomes implausible as soon as learnability constraints are brought to bear on the matter. Quine's new definition of logical truth in terms of grammatical structure is vindicated. It is shown how the apparent conflict between his earlier and his later views on ontology can be superseded. Can Quine hold a relativist view of ontology and at the same time maintain a non-relativist theory of truth? Can he hold that truth is internal to theories and claim that scientific theories are underdetermined by observational data without lending support to relativism? An affirmative answer to the first question is defended. It is argued however that Quine could not meet the second challenge. Quine's penetrating criticism of modal logic has prompted several research programs. Paul Gochet exhibits the interrelations between these programs and argues that Quine's objections against modal logic can be met without any commitment to doctrines such as essentialism. Of interest to philosophers, logicians, linguists.

The French Prompter: a Complete Handbook of Conversation A.P. Le Page, 1847 *La force des raisons* Ali Benmakhlouf, 2018-10-17
Certaines questions parmi les plus contemporaines comme celle du projet parental pour inscrire l'embryon *in vitro* dans une ligne humaine ou celle d'une activité cérébrale détectée par imagerie cérébrale fonctionnelle dans le cas des comas avancés sont la fois métaphysiques et logiques. Pour les aborder et de faire ainsi les crampes mentales la conscience apeurée d'un monde livré aux technologies et l'inflation de la parole des experts il faut procéder une révision des schémas conceptuels. Ali Benmakhlouf philosophe logicien ancien membre du Comité consultatif national d'éthique grand lecteur de Montaigne et de Lewis Carroll promeut les deux concepts de compréhension et d'numération comme permettant d'éviter la double réduction du concept au récit et de l'éthique de la technique. La démarche défendue dans ce livre assume que l'éthique n'est pas un savoir bien qu'elle repose sur un savoir. C'est une éthique intégrative de la science une éthique relative parce qu'elle est durable mais non relativiste car elle repose sur des raisons et des alternatives sans valeur établie et discutée une éthique qui prend le chemin des aventures conceptuelles de la science non pour se faire science elle-même mais pour être suffisamment informée en vue de décrire les dilemmes que les choix humains affrontent tous les jours. Ali Benmakhlouf agrégé de philosophie est professeur à l'Université Paris Est Créteil et membre senior de l'Institut universitaire de France. Le fil directeur de ses recherches est la logique il est notamment spécialiste de G. Frege et B. Russell auxquels il a consacré de nombreux ouvrages. Il est actuellement engagé dans les débats sur la bioéthique notamment dans l'Académie nationale de pharmacie dont il est membre correspondant. *Dictionnaire des Philosophes* Encyclopædia Universalis, 2015-10-27
