Wohl, 2009-06-08 This beautifully written and deeply personal collection of essays paints a progressive view of the American West as seen by a geologist Ellen Wohl traces her twenty years of living and conducting research in the natural landscapes of the West as she investigates the conflict between environmental history and widely held romanticized views of the region Wohl grew up in Ohio subscribing to a common perception of the American West as an unchanged frontier Moving to Arizona she became enthralled with how the landscapes and ecosystems of the West have undergone change both through geologic time and during the historical era of European settlement These essays tell of her early training as a geomorphologist and provide a memorable account of her research in the rivers of the West As the lessons accrue Wohl gives us the benefit of her experience and shows how years of studying and living in the Colorado Rockies have enhanced her understanding of landscape change through time Building on the literary tradition of Joseph Wood Krutch Terry Tempest Williams and John McPhee Wohl provides an up to date portrait of the West and brings a new urgency to the call for conservation of the region s land water and resources **Expository Discourse in Children, Adolescents, and Adults** Marilyn A. Nippold, Cheryl M. Scott, 2013-03-07 School success in the 21st century requires proficiency with expository discourse the use and understanding of informative language in spoken and written modalities This occurs for example when high school students read their textbooks and listen to their teachers lectures and later are asked to demonstrate their knowledge of this complex topic through oral reports and essay examinations Although many students are proficient with the expository genre others struggle to meet these expectations This book is designed to provide information on the use and understanding of expository discourse in school age children adolescents and young adults Recently researchers from around the world have been investigating the development of this genre in typical students and in those with language disorders Although many books have addressed the development of conversational and narrative discourse by comparison books devoted to the topic of expository discourse are sparse This crossdisciplinary volume fills that gap in the literature and makes a unique contribution

to the study of language development and disorders It will be of interest to a range of professionals including speech language pathologists teachers linguists and psychologists who are concerned with language development and disorders

Freedom of Speech and Islam Dr Erich Kolig, 2014-09-28 Freedom of speech and expression is considered in the West a high public good and an important social value underpinned by legislative and ethical norms Its importance is not shared to the same extent by conservative and devout Muslims who read Islamic doctrines in ways seemingly incompatible with Western notions of freedom of speech Featuring experts across a spectrum of fields within Islamic studies *Freedom of Speech and Islam* considers Islamic concepts of blasphemy apostasy and heresy and their applicability in the modern world

From Gesture in Conversation to Visible Action as Utterance Mandana Seyfeddinipur, Marianne Gullberg, 2014-08-06 Language use is fundamentally multimodal Speakers use their hands to point to locations to represent content and to comment on ongoing talk they position their bodies to show their orientation and stance in interaction they use facial displays to comment on what is being said and they engage in mutual gaze to establish intersubjectivity This volume brings together studies by leading scholars from several fields on gaze and facial displays on the relationship between gestures sign and language on pointing and other conventionalized forms of manual expression on gestures and language evolution and on gestures in child development The papers in this collection honor Adam Kendon whose pioneering work has laid the theoretical and methodological foundations for contemporary studies of multimodality gestures and utterance visible action

Corporate Opportunities Marco Claudio Corradi, 2021-08-26 This monograph provides a comprehensive analysis of corporate opportunities doctrines from a comparative perspective It looks at both common law and civil law rules and relies to a large extent on a law and economics approach This book broadens the conventional view on corporate opportunities a vital step in light of the adoption of corporate opportunities rules in civil law jurisdictions and in light of investors ever changing strategies This approach considers institutional complementarities and especially industrial complementarities The book thus explores several jurisdictions and their economic and industrial environments whilst also assessing the impact of globalisation onto legal reform Furthermore it analyses the problems related to the application of corporate opportunities rules to cross border venture capital In normative terms the book

advances one main stance articulated in three points first it proposes different sanctions for undisclosed and disclosed misappropriations supporting the core idea that sanctions should be set against disclosure and not authorisation Secondly it advances the idea that sanctions against undisclosed misappropriations should be more severe than the ones presently applied Thirdly it considers the possibility of a more flexible treatment of disclosed misappropriations This study is positioned at the intersection of several fields providing a lens into a much broader range of dynamics that will be of interest to a varied international readership and offering a window into the broader institutional dynamics at work in centres of innovation eg Silicon Valley and industrial districts in other jurisdictions It is rooted in law and economics but the emphasis is placed on how corporate opportunities rules fit within a broader set of institutional dynamics that affect innovation industrial efficiency and economic competitiveness *The Routledge Handbook of English Language and Digital Humanities* Svenja

Adolphs,Dawn Knight,2020-04-16 The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities Divided into three sections this handbook covers sources and corpora analytical approaches English language at the interface with other areas of research in the digital humanities In covering these areas more traditional approaches and methodologies in the humanities are recast and research challenges are re framed through the lens of the digital The essays in this volume highlight the opportunities for new questions to be asked and long standing questions to be reconsidered when drawing on the digital in humanities research This is a ground breaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities

Esposito,M. Bratanić,E. Keller,2007-05-22 The main theme of this publication is the fundamental features of verbal and nonverbal communication and their relationships with the identification of a person his her socio cultural background and personal traits The problem of understanding human

behaviour in terms of personal traits and the possibility of an algorithmic implementation that exploits personal traits to identify a person unambiguously are among the great challenges of modern science and technology On the one hand there is the theoretical question of what makes each individual unique among all others that share similar traits and what makes a culture unique among various cultures On the other hand there is the technological need to be able to protect people from individual disturbance and dangerous behaviour that could damage an entire community As regards to the problem of understanding human behaviour one of the most interesting research areas is that related to human interaction and face to face communication It is in this context that knowledge is shared and personal traits acquire their significance
