**Infectious Disease Ecology and Conservation** Johannes Foufopoulos, Gary A. Wobeser, Hamish McCallum, 2022-02-10 Emerging infectious diseases pose an increasingly serious threat to a number of endangered or sensitive species and are increasingly recognized as one of the major factors driving species extinction Despite the significant impact of pathogens on conservation no single book has yet integrated the theoretical principles underlying disease transmission with the practical

health considerations for helping wildlife professionals and conservation biologists to manage disease outbreaks and conserve biodiversity This novel and accessible book starts with a foundational section focusing on the role of pathogens in natural ecosystems the dynamics of transmission in different environments and the factors driving wildlife disease outbreaks It then moves on to more applied issues concerned with the acquisition of field data including sampling experimental design and analysis as well as diagnostic analyses in both the laboratory and field Guidelines for effective modelling and data analysis follow before a final section is devoted to disease prevention and control including the prevention of novel outbreaks the use of diseases as biocontrol agents and the associated issues of ethics public communication and outreach Infectious Disease Ecology and Conservation is primarily aimed at advanced undergraduates graduate students and established researchers in the fields of conservation biology disease ecology population ecology and veterinary science It will also be a valuable reference for conservation practitioners land managers and wildlife professionals who are required to deal with disease outbreak problems

Strategies for Managing Global Environmental Risks German Advisory Council on Global Change, 2013-03-13 Global risk potentials and their interplay with economic social and ecological processes of change have emerged as a challenge to the international community By presenting this report the Council hopes to contribute constructively to an effective efficient and objective management of the risks of global change The approach taken by the Council is first to classify globally relevant risks and then to assign to these classes of risk both established and innovative risk assessment strategies and risk management tools On this basis management priorities can be set The Council further recommends a number of cross cutting strategies for international policies These include worldwide alignment of liability law creation of environmental liability funds establishment of a United Nations Risk Assessment Panel and implementation of strategies aimed at reducing vulnerability to risk

The economics of biological invasions Charles Perrings, Silvana Dalmazzone, Mark Herbert Williamson, 2000 An interesting book catering perhaps for a more specific audience It does however provide a somewhat new view of the problems of the field of biological invasions and is worth the effort Ann Sundqvist M2 Best Books Once again Charles Perrings and colleagues have broken new ground by applying economic and ecological analysis to the very real problem of biological invasions This is path breaking work in what promises to be a new sub discipline within environmental economics David Pearce University College London UK Biological invasions the introduction of living organisms beyond their original range are one of the main drivers of biodiversity loss They are a major threat to human health and a source of pests and pathogens in the world s farms forests and fisheries The growth of international trade and travel means that more species are being introduced to more places than ever before This book represents the first concerted effort to understand the economic causes and consequences of biological invasions The volume discusses the theoretical and methodological issues raised by invasion including control strategies modelling options and a study of the economic institutional and policy conditions that predispose countries to biological invasions Also included are

case studies of fisheries agricultural systems tropical forests and protected areas affected by invasive species in locations such as the Black Sea Australia and Africa and an evaluation of control programmes      **Library of Congress Subject Headings** Library of Congress.
