Samuel I. Zeveloff,2013-07-09 The word raccoon is drawn from the Native American Algonquian language Their term arakun
roughly translates to he who scratches with his hands Anyone who has found a raccoon rummaging around in a once securely
closed trash container can attest to how skillful raccoons are with their front paws In fact they have four times as many
sensory receptors in their forepaw skin as they do in their hindpaws a ratio similar to that of human hands and feet Samuel
Zeveloff explores this trait and much more in his accessible natural history of raccoons Written with the general reader in
mind *Raccoons* presents detailed information on raccoon evolution physical characteristics social behavior habitats food
habits reproduction and conservation as well as their relationship with humans and many other topics The section on
distribution and subspecies focuses on the raccoon s current range expansion and the material on their cultural significance
