**Educational Subnormality** Sally Tomlinson, 2018-09-03 First published in 1981 Based on a three year study of children moving into special ESN M education in an English city in the mid 1970s this book questions the whole concept of mild educational subnormality by examining the criteria according to which professionals make decisions to place children within this stigmatised category It suggests that the beliefs that the professionals hold about the behavioural family and class characteristics of the children help to determine their judgements and that these beliefs are related to their own position within the social structure

**Does Education Have a Future?** Jarl Bengtsson, Albert van den Berg, Alain Gras, B.J. Hake, Ian Lister, Jürgen Zimmer, 2012-12-06 This volume has been prepared in the framework of Project 1 Educating Man for the 21st Century of Plan Europe 2000 sponsored by the European Cultural Foundation While most of the studies launched under this Project deal with specific aspects or levels of education the present volume attempts to provide a more global view of educational futures and their relationships to alternative futures of the overall socio economic system It should not be considered as a general integration or synthesis of the different studies of the Education Project of the European Cultural Foundation although it draws on them as well as other recently published documents Rather it should be regarded as one of several possible approaches analytical tools and incentives to the study and open discussion of educational problems seen in a long term perspective The volume is the result of a collective effort of a multinational team of researchers A colloquium of some sixty participants meeting at the University of York in October 1972 provided critiques and comments to the first version of the report But only the authors themselves claim responsibility for the methodology of the study and the opinions and conclusions expressed therein These do not necessarily reflect those of the sponsors of the volume the European Cultural Foundation and the Scientific Committee of its Education Project Such a synthesis will appear as the concluding report of the Project

**The Origins of Human Potential** Ken Richardson, 2002-09-26 Few scientific debates have been more protracted and intense than whether we are born with our cognitive ability whether our environment moulds it or whether these two things interact to produce it The Origins of Human Potential offers a new insight into the arguments by showing that many of the assumptions on both sides are false Ken Richardson re examines evidence about the nature of genes in development the environment and the development of cognitive ability and the nature of cognitive ability itself Can it really be measured in an IQ test like height or weight Ken Richardson s human centred view describes the evolutionary context of our dynamic changeable environments and the creative individual at the heart of the debate It will be of great relevance to psychologists and education policy makers and should be read by all those with an interest in our children s future

*Psychology and Race* Peter Watson, Since the problems of race relations are worldwide the international origins and perspectives of this excellent and timely book are especially advantageous More research has been done in the United States than elsewhere on the psychology of race relations so it is appropriate that a plurality of the chapters of this book are by American authors a

stellar group that includes leading contributors to our contemporary knowledge of the topic Contributors from the English speaking Commonwealth countries are next in number followed by authors from the United Kingdom where race related issues have only recently become a salient concern of politics and social ethics The editor has assigned topics to his carefully chosen author experts not by country or region but by matching the expertise of each author against a need for coherent analysis of the important aspects of psychology and race Psychology and Race is divided into two major parts The first half of the book looks at the interracial situation itself The first section concentrates on the majority or dominant group and describes the development and measurement of racial awareness and prejudice and techniques for reducing prejudice the second section focuses on the reactions of subordinate or minority groups and the third deals with specific aspects of interpersonal interaction attitudes behavior and performance when the people concerned are of different races The book also looks at those areas of life where race is relevant and where psychology can help in an understanding of the situation The scope of this volume the distinction of its authors and the hardheaded sense of reality it brings to the discussion of these extremely complex issues will make it an invaluable resource not only for teachers and students but also for everyone concerned in any way with this most pressing issue of our times Peter Watson was deputy editor of The New Society and spent a total of four years with The London Sunday Times as part of their Insight Team He has written several books and since 1998 has been Research Associate at the Illicit Antiquities Research Centre located at the McDonald Institute for Archaeological Research at the University of Cambridge United Kingdom

**A Sociology of Special and Inclusive Education** Sally Tomlinson, 2017-02-24 A Sociology of Special and Inclusive Education brings sociological perspectives to bear on the social political and economic policies and practices that comprise special and inclusive education and the education of lower attainers Increasingly governments have accepted the premise that education should incorporate all social and ethnic groups especially those regarded as having special educational needs disabilities and difficulties in learning but despite a plethora of literature on special and inclusive education world wide governments are still unsure of the reasons for this sector's expansion in their national education systems Professor Tomlinson applies critical sociological perspectives to the social processes policies and practices that comprise special and inclusive education particularly in England and the USA She clearly examines the way in which people or groups exercise power and influence to shape this area of education and discusses the conflicts of interest that arise in resulting social interactions and relationships Key questions asked include Why and how has a whole sector of education dealing with young people regarded as having learning difficulties low attainments behaviour problems or disabilities developed How have special education programmes and resources become subsumed into variations of inclusive education Why have ideological beliefs in hierarchies of ability limits to learning potential and IQ as measurement continued to legitimate the treatment of young people What happens to young people after their special included or lower attainers programmes in terms of work and life chances A Sociology of Special and Inclusive

Education will be of interest to a wide range of educators professionals practitioners and policy makers concerned with special inclusive and vocational education in addition to undergraduate post graduate and research students and academics

**Equality in Liberty and Justice** Antony Flew, Equality in Liberty and Justice is an integrated collection of essays in political philosophy divided into two parts The first examines classically liberal ideas the ideas of the Founding Fathers of the American republic and some of the applications and the rejections of such ideas in our contemporary world Among other questions about liberty and responsibility it considers in the context of the imprisonment and psychiatric treatment of dissidents in the psychiatric hospitals of the former Soviet Union Plato s suggestion that all delinquency is an expression of mental disease The second part examines the relations and the lack of relations between old fashioned without prefix or suffix justice and what is called by its promoters social justice It therefore presses such questions as Equal outcomes or equal justice and Enemies of poverty or of inequality Equality in Liberty and Justice was originally published before the winning of the Cold War and the collapse of the Soviet Empire This second edition updates the arguments of the previous editor and draws present day moral conclusions This book will appeal to those for whom the classical liberal and conservative debates still have great meaning Flew might well be the most significant synthesizer of Tocqueville and Mill *The Wayward Curriculum* Dennis O'Keeffe,1986 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1972 First multi year cumulation covers six years 1965 70 EBOOK: Assessing Children's Mathematical Knowledge Barry Cooper, Mairead Dunne,1999-12-16 this work is highly relevant to the proliferation of accountability measures worldwide James Scheurich and Douglas Foley In many countries the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects In England the majority of the items in such tests have set mathematical tasks in every day situations such as shopping This requires children to make decisions about whether to use or not their own every day knowledge and experience in their problem solving Some children are likely to have a better feel for this game than others Assessing Children s Mathematical Knowledge draws on the analysis of national curriculum test data from more than 600 children of 10 11 and 13 14 years of age as well as in depth interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children experience with realistic items The book shows by comparing test and interview data that many children as a consequence of their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and understanding that they actually possess The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds and across the sexes The book will be of interest to academics and teachers studying for advanced degrees in mathematics education sociology of education and educational assessment The Construction of Racial Identity in Children of Mixed Parentage Ilan Katz,1996 This book is a major contribution to the literature on race identity and child development and offers a radically new way of looking at some of these issues Based on intensive research on interracial

families the book reviews the previous literature relating to racial identity development and shows it to be based on flawed assumptions

*Contemporary Theories in the Sociology of Education* Jack Demaine, 1981-05-01

*Bilingualism and Language Disability (PLE: Psycholinguistics)* Nick Miller, 2013-11-12

Society is becoming increasingly multi lingual and this presents monolingual professionals particularly those in special education and speech pathology with severe problems Is the language delay in a child from a bilingual environment a result of this background or is there a specific speech problem Is a child s poor performance in school due to his problems of coping with two languages or does he need remedial teaching

Originally published in 1984 this book is not concerned with second language learning but with speech and learning difficulties in bilingual children as they are presented to remedial teachers psychologists and speech therapists To this end the first group of specially written articles deals with the patterns of language usage in bilingual communities and the social and psychological factors which shape these patterns with processes in normal bilingual language acquisition and with the relationship between cognitive development and growing up with two languages Management issues and methods involved in helping children with language problems are also tackled they include taking case histories family liaison counselling bilingual programmes mother tongue teaching curriculum development and the training of personnel to work in the bilingual bicultural field This book provided a great deal of practical help in a field that was relatively new at the time of writing and helped to enlighten readers on the issues involved and assist in crystalising thought and directing future research

**Community Work and Racism** Ashok Ohri, Basil Manning, Paul Curno, 2023-03-24

First published in 1982 Community Work and Racism takes as its theme the fundamental need of the black community in Britain to be freed from the disabling effects of white racism both in the individual and institutional forms Starting from the premise that racism is a white problem in Britain the book argues that community work must put white racism on everyone s local and national

alliances in the fight against racism in British society The contributors consider the response or lack of it there has so far been by white community work to racism and look at the state's response to racism as it impinges on community work They discuss black community action and initiatives on racism explore alliances which have come into being in the fight against racism and examine the conditions which make such alliances possible This book will be of interest to students of sociology public policy race and ethnic studies      Parents and Children in the Inner City Harriett Wilson,G.W. Herbert,2012-12-06

This book was first published in 1978 The parents about whom the authors have written this book live in the poorest areas of a large city They are widely dispersed they do not know one another There are certain features about their lives that bind them together and make them speak as if they had exchanged their views Many come from large families and know the sorrows of premature death disablement stillbirth and unwanted pregnancy This account of fifty six families is an attempt to explore the interrelationship between the parents circumstances and the difficulties encountered by their children

Eugenics, Literature, and Culture in Post-war Britain Clare Hanson,2013 This book explores eugenics in its wider social context and in literary representations in post war Britain Drawing on a wide range of sources in medicine social and educational policy genetics popular science science fiction and literary texts Hanson tracks the dynamic interactions between eugenic ideas across diverse cultural fields demonstrating the strength of the eugenic imagination Challenging assumptions that eugenics was fatally compromised by its association with Nazi atrocities or that it petered out in the context of changed social attitudes in an egalitarian post war society the book demonstrates that eugenic thought not only persisted after 1945 but became more prominent Throughout eugenics is defined as a cultural movement rather than more narrowly as a science and the study is focused on its border crossing capacity as a style of thought By tracing the expression of eugenic ideas across disciplinary boundaries and in both high and low culture this book demonstrates the powerful and pervasive influence of eugenics in the post war years Authors visited include Raymond Williams John Braine Agatha Christie Muriel Spark Anthony Burgess Doris Lessing and J G Ballard
