Radar Days:

Radar Days E G. Bowen, 2022-03-02 It is now more than sixty years since radar began in Britain In the intervening years airborne radar has become one of the most important branches of civilian and military radar In *Radar Days* the father of airborne radar Dr Taffy Bowen recounts his personal story of how the first airborne radars were built and brought into use in the Royal Air Force and of the Tizard mission to the USA in 1940 of which he was a member Written from the point of view of the individuals who worked at the laboratory bench the story begins with the building of the first ground air warning radar at Orfordness in June 1935 The book proceeds to describe how this equipment was miniaturized to make it suitable for use in aircraft and the lengthy sometimes hazardous flight trials conducted before radar went into service with the RAF The author also details the activities of the Tizard mission which was instrumental in installing the first airborne radars in US aircraft The greatest achievement of the mission was to pass on the secret of the resonant magnetron to the US only a few months after its invention at Birmingham University This was the device that brought about a revolution in Allied radar putting it far ahead of the corresponding German technology for the remainder of the war *The Log* ,1945-07 [Radar in Meteorology](#) David Atlas, 2015-03-30 This fully illustrated volume covers the history of radar meteorology deals with the issues in the field from both the operational and the scientific viewpoint and looks ahead to future issues and how they will affect the current atmosphere With over 200 contributors the volume is a product of the entire community and represents an unprecedented compendium of knowledge in the field **Sea-ice Mission Requirements for the U.S. FIREX and Canada RADARSAT Programs** Frank D. General Accounting Office, 1987 *Echoes of War* Sir Bernard Lovell ,1991-01-01 August 1939 was a time of great flux The fear of impending war fueled by the aggression of Nazi Germany forced many changes Young people pursuing academic research were plunged into an entirely different kind of research and development For Bernard Lovell the war meant involvement in one of the most vital research projects of the war radar *Echoes of War* The Story of H2S Radar presents a passionate first hand account of the development of the Home Sweet Home H2S radar systems during World War II The book provides numerous personal insights into the scientific culture of wartime Britain and details the many personal sacrifices setbacks and eventual triumphs made by those actively involved Bernard Lovell began his work on airborne interception radar in Taffy Bowen s airborne radar group He was involved in the initial development of the application of the 10 centimeter cavity magnetron to airborne radar that revolutionized radar systems In the autumn of 1941 the failure of Bomber Command to locate its target over the cloudy skies of Europe prompted the formation of a new group to develop a blind bombing system Led by Lovell this group developed the H2S radar system to identify towns and other targets at night or during heavy cloud cover H2S first saw operational use with the Pathfinder Squadrons in the attack on Hamburg during the night of January 30

31 1943 Two months later modified H2S units installed in Coastal Command aircraft operating over the Bay of Biscay had a dramatic tactical effect on the air war against U boats The tide had begun to turn In this fascinating chronicle of the H2S radar project Sir Bernard Lovell recreates the feel and mood of the wartime years **The Geology of the Terrestrial**
