Maestro of Science Jason S. Ridler, 2015-11-26 One of the brightest Canadian scientists of his generation Omond McKillop Solandt was a physiologist by training an engineer by disposition and a manager by necessity A protégé of insulin's co-discoverer Charles Best Solandt worked as a scientist for the British government during the Second World War including as a pioneer of operational research and a manager of scientific establishments Ending the war as a colonel he served on the British Mission to Japan where he studied the effects of the atomic bombs at Hiroshima and Nagasaki before returning to Canada to become chairman of the newly created Defence Research Board There he spearheaded Canada's attempt to create a new and innovative government science infrastructure that served the needs of the Canadian military at the dawn of the nuclear age and worked alongside allies in Britain and the United States In Maestro of Science Jason S Ridler draws on interviews with Solandt and his colleagues and declassified records from Canada and the United Kingdom to paint a vivid picture of the influence and achievements of a Canadian leader in Cold War military research      **100 Years of Radar**

Gaspard Galati, 2015-09-15 This book offers fascinating insights into the key technical and scientific developments in the history of radar from the first patent taken out by H Lsmeyer in 1904 through to the present day Landmark events are highlighted and fascinating insights provided into the exceptional people who made possible the progress in the field including the scientists and technologists who worked independently and under strict secrecy in various countries across the world in the 1930s and the big businessmen who played an important role after World War II The book encourages multiple levels of reading The author is a leading radar researcher who is ideally placed to offer a technical scientific perspective as well as a historical one He has taken care to structure and write the book in such a way as to appeal to both non-specialists and experts The book is not sponsored by any company or body either formally or informally and is therefore entirely unbiased The text is enriched by approximately three hundred images most of which are original and have been accessed by detailed searches in the archives      **Guardian of the Gulf** Brian Douglas Tennyson, Roger Sarty, 2000-01-01 A vivid and long overdue account of one of the great untold Canadian military stories Sydney's importance as a major convoy port a base in the hunt for German submarines and an industrial centre producing critically important coal and steel      **Dominions**

**Apart** Roy M. MacLeod, Richard A. Jarrell, 1994      *The Science of War* Donald Avery, 1998-01-01 The Second World War with its emphasis on innovative weapons and defence technology brought about massive changes in the role of scientists in Canada the United States and Great Britain Canadian scientists working through the auspices of the National Research Council and the Department of National Defence made important contributions to the development of alliance warfare Before 1939 Canada had only a minute military establishment and a limited industrial and academic capacity for research and development With the outbreak of war all this changed dramatically This book explains how and why Canada was able to play in the big leagues of military technology including the development of radar RDX explosives proximity fuses chemical and biological warfare and the atomic bomb It also investigates the evolution of the Canadian national security state which attempted to protect defence secrets both from the Axis powers and from Canada's wartime ally the Soviet Union The Science of War provides both a cross disciplinary overview of the scientific and military activity of this period in several countries and a fascinating analysis of what the author calls Big Science in Canada      Wireless and Empire Aitor Anduaga Egaña, Aitor Anduaga, 2009-02-19 Although the product of consensus politics the British Empire was based on communications supremacy and the knowledge of the atmosphere Focusing on science industry government the military and education this book studies the relationship between wireless and Empire throughout the interwar period      **Canadiana**, 1981-06      **Science and the Pacific War** Roy M. MacLeod, 1999-12-31 In 1995 the fiftieth anniversary of the end of the Second World War occasioned many reflections on the place of science and technology in the conflict That the war ended with Allied victory in the Pacific theatre inevitably focussed attention upon the Pacific region and particularly upon the Manhattan project and its outcome It was in the Pacific that Western physics and engineering gave birth to the Atomic Age However the Pacific war had also proved a testing time and a testing space for other disciplines and institutions Extreme environments and operational distances and the fundamental demands of logistics required the Allies and the Japanese to innovate many scientific and technological practices Just as medicine and botany were called upon to fight tropical diseases and insect pests so engineers anthropologists and geographers were called upon to understand local conditions and climates and to work with local peoples whose traditional lives were changed forever by the experience At the same time the war played midwife to a host of new developments not least in scientific intelligence and in chemical and biological weapons which were to acquire far greater importance after 1945      **To See the Unseen** Andrew J. Butrica, 1996      *International review of military history*, 1982
