The Routledge Handbook of Love in Philosophy Adrienne M. Martin, 2019-01-15 The Routledge Handbook of Love in Philosophy collects 39 original chapters from prominent philosophers on the nature meaning value and predicaments of love presented in a unique framework that highlights the rich variety of methods and traditions used to engage with these subjects This volume is structured around important realms of human life and activity each of which receives its own section I Family and Friendship II Romance and Sex III Politics and Society IV Animals Nature and the Environment V Art Faith and Meaning VI Rationality and Morality VII Traditions Historical and Contemporary This last section includes chapters treating love as a subject in both Western and non Western philosophical traditions The contributions all appearing in print here for the first time are written to be accessible and compelling to non philosophers and philosophers alike and the volume as a whole encourages professional philosophers teachers students and lay readers to rethink standard constructions of philosophical canons

By Knowledge & by Love Michael S. Sherwin, 2005 What is the relationship between charity and knowledge in the theology of Thomas Aquinas Did Aquinas in his mature thought portray charity s act as antecedent to and independent of practical reasoning Did he view charity s motion as rendering us morally good before God apart from whether or not we do what is right in our actions A dominant stream in contemporary Catholic ethics holds for precisely such a concept of charity and many recent commentators on Aquinas maintain that this is his position as well According to Michael S Sherwin however the contrary is in fact the case By Knowledge and By Love represents a major contribution to Thomistic moral theology and philosophy by providing a thoughtful examination of Aquinas psychology of action and his theology of charity Through a comprehensive analysis of the relation between intellect and will knowledge and love and charity and the infused intellectual virtues Sherwin concludes that far from divorcing the will from reason Aquinas in his later works integrates reason and will more closely together Saint Augustine says No one can love what he does not know this dynamic in the gift of charity which depends on faith s knowledge and on the knowledge provided by the other infused cognitive virtues and gifts Charity is a virtue and like any virtue its acts require some knowledge of their object Sherwin argues that not only is this a faithful reading of Aquinas it also has profound implications for any conception of moral development The role of a mentoring community the characteristics of friendship with God and the specific actions required by love all play a part in Sherwin s analysis

Seat of Wisdom James M. Jacobs, 2022-01-14 The Catholic Church has always recognized that philosophy is necessary both to understand the faith as well as to defend it The need for a philosophically informed faith has become more acute with the rise of secularism *Seat of Wisdom* demonstrates that the philosophical principles developed in the Catholic tradition especially as articulated in Thomism provide the intellectual foundation for belief in God and are also the only reliable basis for a fully coherent vision of man's place in the world *Seat of Wisdom* begins with an exploration of the relationship between faith and reason Philosophy's essential role is to discover the rational principles underlying the intelligible order of reality These principles act as a bridge connecting science and religious faith enabling the believer to integrate all facets of human experience Each of those first principles as expressed in the transcendental properties are then analyzed as the basis of the major philosophical disciplines Starting with metaphysics study of being the argument proceeds to consider the true the good and the beautiful in terms of epistemology anthropology ethics aesthetics and political philosophy Lastly these principles are shown to point to God as creator The strength of the Catholic philosophical tradition is evident when contrasted with reductive theories which fail to account for the breadth of human experience Consequently each chapter will introduce influential philosophers whose inadequate theories inform contemporary assumptions Against this the Thomistic argument is elucidated as being inclusive of the insights of the reductive position It will be seen that this both and approach is the only way to do justice to the glory of God and the gift of creation Religion is prey to skepticism when it is isolated from the rest of knowledge This integrative argument uniting discussions of nature politics and theology according to common principles enables the reader to grasp the unity of wisdom Moreover by engaging alternative positions it provides the reader with tools to defend the Catholic worldview against those reductive philosophies which only deprive life of its full meaning

Kant on Love Pärttyli Rinne, 2018-01-22 This is an immensely useful resource for other scholars and philosophers wishing to understand Kant's views on love Rae Langton University of Cambridge What did Immanuel Kant really think about love In *Kant on Love* Pärttyli Rinne provides the first systematic study of love in the philosophy of Kant Rinne argues that love is much more important to Kant than previously realised and that understanding love is actually essential for Kantian ethical life The study involves two interpretative main propositions First that love in Kant includes an underlying general division of love into love of benevolence and love of delight Further the study divides Kant's concept of love into several aspects of love such as self love sexual love and love of beauty love of God love of neighbor

and love in friendship A chapter of the book is devoted to each of these aspects beginning with the lowest forms of self love as crude animality and moving gradually upwards towards idealised ethical notions of love One way or another the major aspects relate to the general division of love This analytical trajectory yields the second main proposition of the study Together the aspects of love reveal an ascent of love in Kant s thought Perhaps surprisingly for Kant love permeates human existence from the strongest impulses of nature to the highest ideals of morally deserved happiness **Thomas Aquinas on the Passions** Robert Miner,2009-04-09 Provides an understanding of Thomas Aquinas account of the passions the elemental forces that affect human happiness **Through the Eyes of Descartes** Cecilia Sjöholm,Marcia Sá Cavalcante Schuback,2024-02-06 I shall here present my life writes Descartes in Discourse on Method as in a painting and my method as a fable Through the Eyes of Descartes demonstrates how a Cartesian aesthetics is interwoven in his thought It brings together a variety of materials his metaphysical writings and essays in natural philosophy through to his letters drawings and printed images Cecilia Sjöholm and Marcia S Cavalcante Schuback seek to bring Descartes into dialogue with contemporary phenomenology as well as contemporary psychoanalytic thought They focus on how perception interacts with emotions and thought and the way in which our gaze is directed toward limit phenomena of beauty and fascination In Through the Eyes of Descartes Cecilia Sjöholm and Marcia S Cavalcante Schuback counter the traditional picture of Descartes by presenting his work in an entirely different light a Descartes of the arts of sensibility of inner images and of imagination **Divine Teaching and the Way of the World** Samuel Fleischacker,2011-04-21 Samuel Fleischacker offers a defense of revealed religion religions that regard a certain text or teaching as wholly authoritative over one s life By reconciling it with secular cognitive and moral practices that allow people to work together regardless of religious difference he shows how these two worldviews can be brought together *Aristotle's Biopsychosocial Model of Psychology and Conceptualization of Character* Daniel E. Lee, Psy.D.,2011-09-01 Aristotle formulated a multidimensional biopsychosocial and dynamic model of psychology and conceptualization of character that prefigured and is congruent with many aspects of contemporary models of psychology Since ancient times Aristotle s work has provided an elaborate detailed and highly operationalized model of psychology and conceptualization of character that is in congruence with and or conceptually related to theoretical operationally defined and empirically researched constructs found in contemporary clinical psychology The various constitutive elements of Aristotle s model of psychology e g sensation perception judgment wish biologically based passions habituated emotional responses opinion will imagination memory recollection and rational thought are reviewed and explicated and an explanation is offered as to how these constitutive elements are woven together to form his conceptualization of character
