Rational Rabbis Science And Talmudic Culture Jewish Literature And Culture:

Rational Rabbis Menachem Fisch, 1997-11-22 a fascinating and thought provoking book The Jewish Quarterly The best introduction to the talmudic literature that is available An extraordinarily important book brilliant and lucid Daniel Boyarin Menachem Fisch has written a rich thoughtful book One will come away from *Rational Rabbis* with a deeper understanding of just what the Talmud is Hilary Putnam Talmudic culture is often viewed as bound by its traditions Menachem Fisch maintains that a close reading of talmudic texts frequently reveals their authors as rabbis who rather than conform uncritically to tradition knowingly set out to expose and resolve problems inherent in the received traditions **Creation and Composition** Jeffrey L. Rubenstein, 2005 The contributors to this book analyze how the redactors of the Talmud transformed and reworked earlier aggadic non legal traditions Critical study of the Babylonian Talmud is founded on the distinction between two literary strata traditions attributed to named sages the Amoraim c 200 450 CE and setam hatalmud the unattributed or anonymous material The conclusion of modern scholars is that the anonymous stratum postdates the Amoraic stratum and should be attributed to the Talmudic redactors also known as Stammaim c 450 700 CE The contribution of the Stammaim to the aggadic non legal portions of the Talmud to midrash narratives ethics and theology has received minimal scholarly attention The articles in this book demonstrate that the Stammaim made a profound contribution to the aggadic portions of the Babylonian Talmud and illustrate the processes by which they created and composed many aggadic traditions The Talmud - A Personal Take Daniel Boyarin, 2018-01-15 This collection of Daniel Boyarin s previously uncollected essays on the Talmud represents the different methods and lines of inquiry that have animated his work on that text over the last four decades Ranging and changing from linguistic work to work on sex and gender to the relations between formative Judaism and Christianity to the literary genres of the Talmud in the Hellenistic context he gives an account of multiple questions and provocations to which that prodigious book gives stimulation showing how the Talmud can contribute to all of these fields The book opens up possibilities for study of the Talmud using historical classical philological anthropological cultural studies gender and literary theory and criticism As a kind of intellectual autobiography it is a record of the alarms and excursions of a life in the Talmud **The End of Dialogue in Antiquity** Simon Goldhill, 2008 This book is a general and systematic study of the genre of dialogue in antiquity investigating why dialogue matters **Border Lines** Daniel Boyarin, 2010-11-24 The historical separation between Judaism and Christianity is often figured as a clearly defined break of a single entity into two separate religions Following this model there would have been one religion known as Judaism before the birth of Christ which then took on a hybrid identity Even before its subsequent division certain beliefs and practices of this composite would have been identifiable as Christian or Jewish In *Border Lines* however Daniel Boyarin makes a striking case for a very different way of thinking about the historical development that is the partition of Judaeo Christianity There were no characteristics or features that could be described as uniquely Jewish or Christian in late

antiquity Boyarin argues Rather Jesus following Jews and Jews who did not follow Jesus lived on a cultural map in which beliefs such as that in a second divine being and practices such as keeping kosher or maintaining the Sabbath were widely and variably distributed The ultimate distinctions between Judaism and Christianity were imposed from above by border makers heresiologists anxious to construct a discrete identity for Christianity By defining some beliefs and practices as Christian and others as Jewish or heretical they moved ideas behaviors and people to one side or another of an artificial border and Boyarin significantly contends invented the very notion of religion

Theologies of the Mind in Biblical Israel Michael Carasik, 2006 Did the Hebrew mind work differently from those of people in the Western tradition of civilization This long discredited question still lingers in biblical studies Theologies of the Mind in Biblical Israel approaches the topic of the Israelite mind from a new direction exploring how the biblical texts themselves especially Proverbs and Deuteronomy describe the working of the mind It demonstrates that the much discussed role of memory in the Bible is just one part of a general understanding that in the realm of knowledge God and humanity are rivals Book Jacket

Ancient Jewish Sciences and the History of Knowledge in Second Temple Literature Seth L. Sanders, 2014-04-28 Until very recently the idea of ancient Jewish sciences would have been considered unacceptable Since the 1990s Early Modern and Medieval Science in Jewish sources has been actively studied but the consensus was that no real scientific themes could be found in earlier Judaism This work points them out in detail and posits a new field of research the scientific activity evident in the Dead Sea Scrolls and early Jewish pseudepigrapha The publication of new texts and new analyses of older ones reveals crucial elements that are best illuminated by the history of science and may have interesting consequences for it The contributors evaluate these texts in relation to astronomy astrology and physiognomy marking the first comprehensive attempt to account for scientific themes in Second Temple Judaism They investigate the meaning and purpose of scientific explorations in an apocalyptic setting An appreciation of these topics paves the way to a renewed understanding of the scientific fragments scattered throughout rabbinic literature The book first places the Jewish material in the ancient context of the Near Eastern and Hellenistic worlds While the Jewish texts were not on the cutting edge of scientific discovery they find a meaningful place in the history of science between Babylonia and Egypt in the time period between Hipparchus and Ptolemy The book uses recent advances in method to examine the contacts and networks of Jewish scholars in their ancient setting Second the essays here tackle the problematic concept of a national scientific tradition Although science is nowadays often conceived as universal the historiography of ancient Jewish sciences demonstrates the importance of seeing the development of science in a local context The book explores the tension between the hegemony of central scientific traditions and local scientific enterprises showing the relevance of ancient data to contemporary postcolonial historiography of science Finally philosophical questions of the demarcation of science are addressed in a way that can advance the discussion of related ancient materials Online edition available as part of the NYU Library's Ancient World Digital Library and in

partnership with the Institute for the Study of the Ancient World ISAW *When a Human Gives Birth to a Raven* Rafael Rachel Neis, 2023-06-06 A free ebook version of this title is available through Luminos University of California Press's Open Access publishing program Visit www.luminosoa.org to learn more This book investigates rabbinic treatises relating to animals humans and other life forms Through an original analysis of creaturely generation and species classification by late ancient Palestinian rabbis and other thinkers in the Roman Empire Rafael Rachel Neis shows how rabbis blurred the lines between humans and other beings even as they were intent on classifying creatures and tracing the contours of what it means to be human Recognizing that life proliferates by mechanisms beyond sexual copulation between two heterosexual male and female individuals of the same species the rabbis proposed intricate alternatives In parsing a variety of creatures they considered overlaps and resemblances across seemingly distinct species upsetting in turn unmitigated claims of human distinctiveness *When a Human Gives Birth to a Raven* enters conversations in animal studies queer theory trans theory and feminist science studies to provincialize sacrosanct ideals of reproduction in favor of a broader range that spans generation kinship and species The book thereby offers powerful historical alternatives to the paradigms associated with so called traditional ideas *Jewish Thought and Scientific Discovery in Early Modern Europe* David B. Ruderman, 2001 A study on the scientific dimension of Jewish intellectual history in the early modern world **Studies in Ancient Judaism and Rabbinic Literature** Robert G. Goldenberg (z"l), 2025-08-18 This volume presents a selection of the works of Professor Robert G Goldenberg a leading scholar of Rabbinic Judaism From the rabbinic interpretation of Hebrew Scriptures to the formation of the Babylonian Talmud Goldenberg explores core themes of Jewish law history and religious thought This collection offers a lasting tribute to Goldenberg's enduring contributions to our understanding of the Jewish tradition
