Donth, 2013-04-17 The glass transition is well known to glass makers or from the common experience of drying a used chewing gum A liquid melt or a rubber becomes a solid glass when its temperature is lowered or a solvent is extracted without crystallization There are also dynamic effects The viscosity of a

liquid is small at high temperatures but increases dramatically as cooling proceeds down to the glass temperature T_g . The increase is continuous and amounts to about fifteen orders of magnitude. The technical importance of the glass transition cannot be overestimated. A few examples will be presented in the Introduction. Most practical knowledge of the glass transition needed for glass or plastic technologies and applications is now readily available. Where then is the problem? In the last few years glass transition research has enormously intensified. We now have several hundred papers a year in expensive top scientific journals. In a 1995 Science magazine ranking the glass transition belongs to the six major physical quests along with broken charges, physical input for low dimensional geometry, measurement philosophy in quantum mechanics, coherent X-ray radiation for materials research and applications of superconductivity. On the other hand, interested people outside the glass transition community have difficulty seeing exactly what the glass transition problems are. In addition, even insiders split into groups over which question could be the most important for slow dynamics in cold liquids.

Rattling the Cage Steven L. Wise, 2000 CageTalk Peter Dickinson, 2014

John Cage was one of America's most renowned composers from the 1940s until his death in 1992. But he was also a much admired writer and artist and a uniquely attractive personality able to present his ideas engagingly wherever he went. As an interview subject he was a consummate professional. The main source of CageTalk Dialogues with and about John Cage is a panoply of vivid and compulsively readable interviews given to Peter Dickinson in the late 1980s for a BBC Radio 3 documentary. The original BBC program lasted an hour but the full discussions with Cage and many of the main figures connected with him were not published until the first edition of this book. CageTalk also includes earlier BBC interviews with Cage including ones by the renowned literary critic Frank Kermode and art critic David Sylvester. And Dickinson, the editor of this volume, contributes little known source material about Cage's Musicircus and Roaratorio as well as a substantial introduction exploring the multiple roles that Cage's varied and challenging output played during much of the twentieth century and continues to play in the early twenty-first. Apart from the long interview with Cage himself, there are discussions with Bonnie Bird, Earle Brown, Merce Cunningham, Minna Lederman, Otto Luening, Jackson Mac Low, Peadar Mercier, Pauline Oliveros, John Rockwell, Kurt Schwertsik, Karlheinz Stockhausen, Virgil Thomson, David Tudor, La Monte Young, and Paul Zukovsky. Most of the interviews were given to Peter Dickinson but there are others involving Rebecca Boyle, Anthony Cheevers, Michael Oliver, and Roger Smalley. Peter Dickinson, British composer and pianist, is Emeritus Professor, University of Keele and University of London and has written or edited several books about twentieth century music including Copland Connotations, Boydell Press 2002, and The Music of Lennox, Berkeley Boydell Press 2003.
