The Lost Pre-Raphaelite Nigel Daly, 2014-08-11 When the author bought a falling down fortified house on the Staffordshire moorlands he had no reason to anticipate the astonishing tale that would unfold as it was restored A mysterious set of relationships emerged amongst its former owners revolving round the almost forgotten artist Robert Bateman a prominent Pre Raphaelite and friend of Burne Jones He was to marry the granddaughter of the Earl of Carlisle and to be associated with Benjamin Disraeli William Gladstone and other prominent political and artistic figures But he had abandoned his life as an artist in mid career to live as a recluse and his rich and glamorous wife to be had married the local vicar already in his sixties and shortly to die The discovery of two clearly autobiographical paintings led to an utterly absorbing forensic investigation into Bateman's life The story moves from Staffordshire to Lahore to Canada Wyoming and then via Buffalo Bill to Peru and back to England It leads to the improbable respectability of Imperial Tobacco in Bristol and then less respectably to a car park in Stoke on Trent En route the author pieces together an astonishing and deeply moving story of love and loss of art and politics of morality and hypocrisy of family secrets concealed but never quite completely obscured The result is a page turning combination of detective story and tale of human frailty endeavor and love It is also a portrait of a significant artist a reassessment of whose work is long overdue Nigel Daly is an antique dealer and house restorer

Mind in health William Lauder Lindsay, 1880 **The Peregrine Falcon** Derek Ratcliffe, 2010-06-30 The first edition of The Peregrine Falcon was widely recognised as a classic of its kind documenting not only the species biology but also the sad tale of its decline due to the impact of pesticides This extensively revised and enlarged second edition takes full account of important new developments in the story of this bird during the intervening 12 years It reports one of the few notable successes in wildlife conservation the full restoration of British and Irish Peregrine populations and their appreciable recovery in other countries where numbers had also been greatly reduced

by the impact of organochlorine pesticides The pattern of increase in Britain has been extremely varied from districts where numbers are now far higher than at any time in recorded history to others where the bird is now at its lowest ebb The examination of the reasons for these differences helps us to understand the most recent developments in the Peregrine saga Particular attention has been paid to the recent major advances in our knowledge of Peregrine biology such as its movements population turnover food and nesting habits Many of the tables and figures have been revised and brought up to date so that this volume like its predecessor is once again by far the most detailed and readable reference on this most evocative of birds Donald Watson's colour paintings monochrome washes and line drawings and the original photographs illustrate the book as before Cover illustration by Donald Watson
