The changing market trends globalization the constant pressure to reduce production costs and technical and technological progress make it necessary to search for new manufacturing methods and ways of organizing them and to modify manufacturing system design paradigms This book presents current research in different areas connected with the design and management of manufacturing systems and covers such subject areas as methods supporting the design of manufacturing systems methods of improving maintenance processes in companies the design and improvement of manufacturing processes the control of production processes in modern manufacturing systems production methods and techniques used in modern manufacturing systems and environmental aspects of production and their impact on the design and management of manufacturing systems The wide range of research findings reported in this book confirms that the design of manufacturing systems is a complex problem and that the achievement of goals set for modern manufacturing systems requires interdisciplinary knowledge and the simultaneous design of the product process and system as well as the knowledge of modern manufacturing and organizational methods and techniques

E-Business and Virtual Enterprises Luis M. Camarinha-Matos, Hamideh Afsarmanesh, Ricardo J. Rabelo, 2013-06-29 The fast progress in computer networks and their wide availability complemented with on one hand the explosion of the mobile computing and on the other hand the trends in the direction of ubiquitous computing act as powerful enablers for new forms of highly dynamic collaborative organizations and emergence of new business practices The first efforts in virtual enterprises VE were strongly constrained by the need to design and develop horizontal infrastructures aimed at supporting the basic collaboration needs of consortia of enterprises Even pilot projects that were focused on specific business domains were forced to first develop some basic infrastructures before being able to develop their specific business models Nowadays although there is still a need to consolidate and standardize the horizontal infrastructures the focus is more and more directed to the development of new vertical business models and the corresponding support tools At the same time in the earlier R D projects the attention was almost exclusively devoted to the operation phase of the VE life cycle while now there are more activities addressing the creation phase developing mechanisms to support the rapid formation of new virtual organizations for new business opportunities In order to complete the life cycle there is a need to also invest on support for VE dissolution
