Globalizing Somalia Emma Leonard, Gilbert Ramsay, 2013-11-07 This collection of essays demonstrates how chronic state failure and the inability of the international community to provide a solution to the conflict in Somalia has had transnational repercussions Following the failed humanitarian mission in 1992 93 most countries refrained from any direct involvement in Somalia but this changed in the 2000s with the growth of piracy and links to international terrorist

organizations The deterritorialization of the conflict quickly became apparent as it became transnational in nature In part because of it lacked a government and was unable to work with the international community Somalia came to be seen as a testing ground by many international actors Globalizing Somalia demonstrates how China Japan and the EU among others have all used the conflict in Somalia to project power test the bounds of the national constitution and test their own military capabilities Contributed by international scholars and experts the work examines the impact of globalization on the internal and external dynamics of the conflict arguing that it is no longer geographically contained By bringing together the many actors and issues involved the book fills a gap in the literature as one of the most complete works on the conflict in Somalia to date It will be an essential text to any student interested in Somalia and the horn of Africa as well as in terrorism and conflict processes
