Properties and Applications of Silicon Carbide Rosario Gerhardt, 2011-04-04 In this book we explore an eclectic mix of articles that highlight some new potential applications of SiC and different ways to achieve specific properties Some articles describe well established processing methods while others highlight phase equilibria or machining methods A

resurgence of interest in the structural arena is evident while new ways to utilize the interesting electromagnetic properties of SiC continue to increase Californium-252 Isotope for 21st Century Radiotherapy J.G. Wierzbicki,2012-12-06
Californium 252 is a neutron emitter with a high specific activity making it useful in a variety of applications the most spectacular of which is in brachytherapy for cancer patients Radiation oncology has exhausted nearly every option for treating radioresistant tumors by photon brachytherapy and therefore new types of radiation need to be studied to improve the curability of cancer Audience Californium brachytherapy is used in only a few radiation therapy centers in the world so the book will be highly instructive for radiation oncologists medical physicists and radiobiologists The nuclear techniques used in clinical applications may also interest nuclear physicists and engineers International Conference on Nuclear Data for Science and Technology, Santa Fe, New Mexico, 26 September-1 October 2004 Robert C.
