Nukak Gustavo Politis, 2016-09-17 From Gustavo Politis one of the most renowned South American archaeologists comes the first in depth study in English of the last undiscovered people of the Amazon His work is groundbreaking and urgent both because of encroaching guerrilla violence that makes Nukak existence perilously fragile and because his work with the Nukak represented one of the last opportunities to conduct research with hunter gatherers using contemporary methodological and the theoretical tools Through a rich and comprehensive ethno archaeological portrait of material culture in the making this work makes methodological and conceptual advances in the interpretation of hunter gather societies Politis's conclusions based on six years of original research and on comparative analysis are integrative and contribute to the identification of the multiple factors involved in the formation of hunter gatherer archaeological assemblages

Archaeology and Religion in Early Northwest India Daniel Michon, 2015-08-12 This book explores the ways in which past cultures have been used to shape colonial and postcolonial cultural identities It

provides a theoretical framework to understand these processes and offers illustrative case studies in which the agency of ancient peoples rather than the desires of antiquarians and archaeologists is brought to the fore **Wetland Archaeology and Beyond** Francesco Menotti, 2012-03-15 *Wetland Archaeology and Beyond* offers an appreciative study of the people and their artefacts who occupied a large variety of worldwide wetland archaeological sites The volume also includes a

comprehensive explanation of the processes involved in archaeological practice and theory **Iconicity of the Uto-Aztecs** Tirtha Prasad Mukhopadhyay, Alan Philip Garfinkel, 2023-05-12 Uto Aztec iconic practices are primarily conditioned by the consciousness of the snake as a death dealing power and as such an animal that displays the deepest fears and anxieties of the individual The attempt to study a snake simulacrum thus constitutes the basic objective of this volume A long all embracing iconicity of snakes and related snake motifs are evident in different cultural expressions ranging from rock art templates to other cultural artifacts like basketry pottery temple architecture and sculptural motifs Uto Aztec iconography demonstrates a symbolic memorial order of emotional valences as well as the negotiations with death and a belief in rebirth just as the skin shedding snake reptile manifests in its life cycle ***Consciousness, Creativity, and Self at the Dawn of Settled Life*** Ian Hodder, 2020-03-05 Over recent years a number of scholars have argued that the human mind underwent a cognitive revolution in the Neolithic This volume seeks to test these claims at the Neolithic site of atalh y k in Turkey and in other Neolithic contexts in the Middle East It brings together cognitive scientists who have developed theoretical frameworks for the study of cognitive change archaeologists who have conducted research into cognitive change in the Neolithic of the Middle East and the excavators of the Neolithic site of atalh y k who have over recent years been exploring changes in consciousness creativity and self in the context of the rich data from the site Collectively the authors argue that when detailed data are examined theoretical evolutionary expectations are not found for these three characteristics The Neolithic was a time of long slow and diverse change in which there is little evidence for an internal cognitive revolution ***Archaeology in Latin America*** Benjamin Alberti, Gustavo G. Politis, 2005-08-16 This pioneering and comprehensive survey is the first overview of current themes in Latin American archaeology written solely by academics native to the region and it makes their collected expertise available to an English speaking audience for the first time The contributors cover the most significant issues in the archaeology of Latin America such as the domestication of camelids the emergence of urban society in Mesoamerica the frontier of the Inca empire and the relatively little known archaeology of the Amazon basin This book draws together key areas of research in Latin American archaeological thought into a coherent whole no other volume on this area has ever dealt with such a diverse range of subjects and some of the countries examined have never before been the subject of a regional study **Evolutionary and Interpretive Archaeologies** Ethan

Cochrane, Andrew Gardner, 2016-09-16 This collection of original articles compares various key archaeological topics agency violence social groups diffusion from evolutionary and interpretive perspectives These two strands represent the major

current theoretical poles in the discipline By comparing and contrasting the insights they provide into major archaeological themes this volume demonstrates the importance of theoretical frameworks in archaeological interpretations Chapter authors discuss relevant Darwinian or interpretive theory with short archaeological and anthropological case studies to illustrate the substantive conclusions produced The book will advance debate and contribute to a better understanding of the goals and research strategies that comprise these distinct research traditions
