namely through its relationship

use-value becomes the form of manifestation
a phenomenal form form of its opposite, value

It would be possible to write a his-
tory of the inventions made since 1830, for the sole
purpose of showing how they have been
supplying capital with weapons against
the working class.

on the one hand it presents itself historically as
progress and as a necessary phase in the economic
development of society, on the other hand it is a
refined and civilized method of exploitation

resistance to the domination of capital

The simplest commodity form contains the whole
secret of the modern form and with it, in embryo,

Reading Capital Politically:

Reading Capital Politically Harry Cleaver, 1979 33 Lessons on Capital Harry Cleaver, 2019-10-20 This book provides an up to date reading of Capital Volume I emphasizing the relevance of Marx's analysis to everyday twenty first century struggles Harry Cleaver's treatise outlines and critiques Marx's analysis chapter by chapter His unique interpretation of Marx's labour theory of value reveals how every theoretical category of Capital designates aspects of class struggle in ways that help us resist and escape them At the same time while rooted within the tradition of workerism he understands the working class to include not only the industrial proletariat but also unwaged peasants housewives children and students A challenge to scholars and an invaluable resource for students and activists today **Reading 'Capital' Today** Ingo

Schmidt, Carlo Fanelli, 2017-04-20 Recent years have seen a surge of interest in Marxian political economy and especially Marx's great work Capital 150 years after the book's original publication are there readings of Capital that can help us find new pathways to progressive or revolutionary change In this wide ranging new volume leading thinkers reflect on Capital's legacy its limitations and its continuing relevance for today highlighting issues including ecology gender race labour communism the Third World and imperialism The contributors also aim to identify the connections between Capital and various socialist projects of the past and draw lessons from those experiences that might contribute to the reinvention of socialist politics today Contributors include Ingo Schmidt Carlo Fanelli William Pelz Anej Korsika Prabhat Patnaik Silvia Federici Paul Thompson Chris Smith Peter Gose Justin Paulson Jeff Noonan Hannah Holleman and Peter Hudis Reading

Capital Louis Althusser, Etienne Balibar, 2009-06-09 Establishing a rigorous program of symptomatic reading that cuts through the silences and lacunae of Capital to reveal its philosophical core Louis Althusser interprets Marx's structural analysis of production as a revolutionary break the basis of a completely new science Building on a series of Althusser's conceptual innovations that includes overdetermination and social formation Etienne Balibar explores the historical and structural facets of production as Marx understood them scrutinizing many of the most fundamental points in Capital as though for the first time **How to Read Marx's Capital** Stephen Shapiro, 2008-03-20 Capital Volume I is essential reading

on many undergraduate courses but the structure and style of the book can be confusing for students leading them to abandon the text This book is a clear guide to reading Marx's classic text which explains the reasoning behind the book's structure and provides help with the more technical aspects that non economists may find taxing Students are urged to think for themselves and engage with Marx's powerful methods of argument and explanation Shapiro shows that Capital is key to understanding critical theory and cultural production This highly focused book will prove invaluable to students of politics cultural studies and literary theory **The Political Philosophy of Poststructuralist Anarchism** Todd May, 1994-07-29

The political writings of the French poststructuralists have eluded articulation in the broader framework of general political philosophy primarily because of the pervasive tendency to define politics along a single parameter the balance between state

power and individual rights in liberalism and the focus on economic justice as a goal in Marxism What poststructuralists like Michel Foucault Gilles Deleuze and Jean Fran ois Lyotard offer instead is a political philosophy that can be called tactical it emphasizes that power emerges from many different sources and operates along many different registers This approach has roots in traditional anarchist thought which sees the social and political field as a network of intertwined practices with overlapping political effects The poststructuralist approach however eschews two questionable assumptions of anarchism that human beings have an essentially benign essence and that power is always repressive never productive After positioning poststructuralist political thought against the background of Marxism and the traditional anarchism of Bakunin Kropotkin and Proudhon Todd May shows what a tactical political philosophy like anarchism looks like shorn of its humanist commitments namely a poststructuralist anarchism The book concludes with a defense contra Habermas and Critical Theory of poststructuralist political thought as having a metaethical structure allowing for positive ethical commitments

Cyberboss Craig Gent,2024-08-27 Across the world algorithms are changing the nature of work Nowhere is this clearer than in the logistics and distribution sectors where workers are instructed tracked and monitored by increasingly dystopian management technologies In **Cyberboss** Craig Gent takes us into workplaces where algorithms rule to excavate the politics behind the newest form of managerial power Combining worker testimony and original research on companies such as Amazon Uber and Deliveroo the cutting edge of algorithmic management technology this book reveals the sometimes unexpected effects these new techniques have on work workers and managers Gent advances an alternative politics of resistance in the face of digital control

Reading Capital's Materialist Dialectic Nick Nesbitt,2024-05-27 While the explicit Althusserian engagement with Marx's Capital remained largely limited to Reading Capital after 1968 Nick Nesbitt argues this theoretical intervention remained insistent adopting the form of a general theory of materialist dialectic The book thus analyzes the Althusserianist theory of a materialist dialectic across diverse sites including Althusser's unpublished archive Macherey's exposition of Spinoza's Ethics and Badiou's Logics of Worlds while simultaneously bringing this fully developed theory of materialist dialectic to bear anew on the reading of Capital itself to show that Spinoza's influence on Marx is far greater and that of Hegel increasingly diminishing than has been previously thought

The End Joel Wainwright,2025-11-25 How Marx provides new insights into our environmental crisis when read alongside Darwin In this pathbreaking study Joel Wainwright shows how deeply Darwin influenced Capital Marx's thinking about history and nature changed generating a distinctive ecological critique of capitalism as a social formation Marx even called Capital a study of natural history

Literacy Research for Political Action and Social Change Mollie V. Blackburn,Caroline T. Clark,2007 This book and its contributors all of whom view literacy research as explicitly political and potentially transformative provide images and approaches that show how work with in the local can and must be connected to global issues in order to effect political action Researchers and educators are urged to take activist stances that directly affect and address the needs of all

people across lines of race class ethnicity sexuality and gender The book is organized into three parts each focusing on different aspects of literacy research for political action These include theoretical considerations and methodological approaches that support this work a reconsideration of the roles of participants as collaborators in this kind of literacy research and finally examples of projects specifically aimed at addressing global issues through local research for political action
