Intensifying Classroom Routines in Reading and Writing Programs Michael P. Ford, 2017-06-15. Three common routines are seen in almost every primary language arts program: morning messages, shared readings, and word walls. These routines should be integrated to support the total language arts program but are teachers of grades K-2 getting the most bang for their buck out of these activities. Morning messages can become very routinized and repeat the same experiences over and over again. Shared readings are sometimes conducted with little variation in spite of changing demands from the texts being used and changing needs in the learners with whom they are being used. Word walls might be put up with some attention early in the year and remain virtually unchanged as the year moves forward. *Intensifying Classroom Routines in Reading and Writing Programs* focuses on how teachers can get more instructional mileage out of these three common classroom routines. Author Michael P. Ford lays out step-by-step, day-by-day plans to put those three key routines on a cycle that changes as students move through developmental phases. This resource helps teachers plan for emergent and early readers and writers. It also looks at how teachers can assist students as they move through critical areas including concepts of print, alphabetic knowledge, phonological awareness, sound-symbol relationships, high-frequency words, structural analysis, context clues, comprehension strategies, and composition strategies. With these intensified routines in place, students will clearly see connections between reading and writing.

Catching Readers Before They Fall Pat Johnson, Katie Keier, 2023-10-10. Every teacher of reading plays a vital role in helping to catch those readers for whom learning to read does not come easily. Through examples from both adults and children, the authors explain and describe the complex, integrated network of strategies that go on in the minds of proficient readers—strategies that struggling readers have to learn in order to construct their own reading processes. This book is essential reading for all who work with struggling readers in any context and contains a wealth of resources, including a thorough explanation of all the sources of information readers use to solve words, examples and scenarios of teacher-student interactions, prompts to use with struggling readers, lessons on modeling and assessment guidelines.
