The Pawnee Ghost Dance Hand Game Alexander Lesser, 1996-01-01 The Ghost Dance religion that swept through the Plains Indian tribes in the early 1890s was embraced wholeheartedly by the Pawnees It was a message of hope to a people devastated by the attacks of enemy tribes the encroachment of white settlers and the outbreak of epidemics For the Pawnees who were looking to the U S government and trying unsuccessfully to farm their land the Ghost Dance movement promised salvation a restoration of the Indian dead the buffalo and the old times Alexander Lesser shows how the Ghost Dance brought about a partial revival of traditional Pawnee culture and its dances and songs The ancient guessing hand game remembered best by a tribe starved for the joy of play became an important part of the Ghost Dance ritual What had been a gambling game a representation of warfare played by men was transformed into a sacred game played by both sexes as an expression of faith or good fortune Lesser surveys the history of the Pawnee Indians and their relations with the federal government and describes in detail the Ghost Dance hand games that were the chief intellectual product of Pawnee culture from the onset of the messianic movement to the original publication of this book in 1933 Citing such authorities as James Mooney and Stewart Culin Lesser produced an enduring classic now introduced by Alice Beck Kehoe a professor of anthropology at Marquette University and the author of The Ghost Dance Ethnohistory and Revitalization A Marxist Archaeology Randall H. McGuire, 2002-12-31 A rich intellectual tradition that offers archaeologists a way around many seemingly irresolvable theoretical oppositions Marxism deserves a place in the philosophical and substantive debates in archaeology This book applies Marxist theory to archaeology explores long term historical change and cultural evolution and

advocates a dialectical and historical approach to the study of the past Originally published by Academic Press in 1992 this edition features a new prologue by the author **'Homo Religiosus' in Mircea Eliade** Saliba,2023-09-20 *Archeology in Cultural Systems* Sally R. Binford,Lewis Roberts Binford, Archeology shares with other anthropological sciences the goal of explaining differences and similarities among cultural systems Sally R Binford and Lewis R Binford therefore are concerned with theory and arguments which treat problems of the interrelationship of cultural variables with explanatory value Archeology in Cultural Systems is devoted to four different aspects of archeology This book progresses from theoretical methodological discussions to specific consideration of archeological materials It focuses on the analysis of archeological remains from a single site Its concern is primarily with recognizing measuring and explaining variability in the form and distribution of a site s cultural remains The authors argue that internal variability derives from the composition and distribution of societal segments represented at the site The work then shifts to study of archeological components or their attributes and seeks explanations for observed differences and similarities A final section of the volume comments and discusses materials in the volume Archeology in Cultural Systems is not a monolithic presentation of any particular school of archeological thought There are common interests and many points of agreement among the authors but there is also diversity of opinion on several points These points are the focus of research here Lewis R Binford is professor emeritus of anthropology at the University of New Mexico He is the author of In Pursuit of the Past Decoding the Archaeological Record and Constructing Frames of Reference An Analytical Method for Archaeological Theory Building Using Hunter Gatherer and Environmental Data Sets Sally R Binford was professor of anthropology at the University of New Mexico She is the author of Stone Tools and Human Behavior Society & Culture , **The Gift of Birds** Ruben E. Relating Religion Jonathan Z. Smith,2004-11-10 One of the most influential theorists of religion Jonathan Z Smith is best known for his analyses of religious studies as a discipline and for his advocacy and refinement of comparison as the basis for the history of religions Relating Religion gathers seventeen essays four of them never before published that together provide the first broad overview of Smith s thinking since his seminal 1982 book Imagining Religion Smith first explains how he was drawn to the study of religion outlines his own theoretical commitments and draws the connections between his thinking and his concerns for general education He then engages several figures and traditions that serve to

define his interests within the larger setting of the discipline The essays that follow consider the role of taxonomy and classification in the study of religion the construction of difference and the procedures of generalization and redescription that Smith takes to be key to the comparative enterprise The final essays deploy features of Smith s most recent work especially the notion of translation Heady original and provocative *Relating Religion* is certain to be hailed as a landmark in the academic study and critical theory of religion

The Rise and Fall of the Caucasian Race Bruce Baum,2008-07-01 The term Caucasian is a curious invention of the modern age Originating in 1795 the word identifies both the peoples of the Caucasus Mountains region as well as those thought to be Caucasian Bruce Baum explores the history of the term and the category of the Caucasian race more broadly in the light of the changing politics of racial theory and notions of racial identity With a comprehensive sweep that encompasses the understanding of race even before the use of the term Caucasian Baum traces the major trends in scientific and intellectual understandings of race from the Middle Ages to the present day Baum s conclusions make an unprecedented attempt to separate modern science and politics from a long history of racial classification He offers significant insights into our understanding of race and how the Caucasian race has been authoritatively invented embraced displaced and recovered throughout our history

Survey Research in the Social Sciences Charles Y. Glock,John Bennett,1967-12-31 Survey research was for a long time thought of primarily as a sociological tool It is relatively recently that this research method has been adopted by other social sciences and related professional disciplines The amount and quality of its use however vary considerably from field to field This volume describes the elementary logic of survey design and analysis and provides for each discipline an evaluation of how survey research has been used and conceivably may be used to deal with the central problems of each field
