New Masculinities in Contemporary German Literature Frauke Matthes, 2023-05-13 The complex nexus between masculinity and national identity has long troubled but also fascinated the German cultural imagination This has become apparent again since the fall of the Iron Curtain and the turn of the millennium when transnational developments have noticeably shaped Germany's self perception as a nation This book examines the social and political impact of transnationalism with reference to current discourses of masculinity in novels by five contemporary male German language authors Specifically it analyses how conceptions of the masculine interact with those of nationality ethnicity and otherness in the selected texts and assesses the new masculinities that result from those interactions Exploring how local discourses of masculinity become part of transnational contexts in contemporary writing the book moves a consideration of masculinities from a native into a transnational sphere
