English Historical Linguistics. Volume 2 Alexander Bergs, Laurel J. Brinton, 2012-10-01 *Semantics: Volume 1* John Lyons, 1977-06-02 Anyone who writes an up to date textbook of semantics has to be au fait with an extremely wide range of contemporary academic activity John Lyons new book demonstrates a remarkable ability to achieve such catholicity of expertise *Feyerabend's Formative Years. Volume 2. Feyerabend on Logical Empiricism, Bohm & Kuhn* Matteo Collodel, Eric Oberheim, 2024-08-27 The authors Matteo Collodel and Eric Oberheim take the reader on a journey through the early life of the famous Austrian philosopher Paul Feyerabend whose groundbreaking work *Against the Method* forged new paths in the philosophical understanding of science Collodel and Oberheim's book contains the translated correspondence of Feyerabend 1924-1994 with equally influential philosophers and scientists of the time including Rudolf Carnap Herbert Feigl Carl G Hempel J J C Smart David Bohm and Thomas Kuhn This book offers an entirely unique approach to the philosopher Paul Feyerabend Informative challenging and profound it immerses the reader deeply in the mind of a truly revolutionary philosopher of science The main focus lies on the explanation of Paul Feyerabend's ideas on logical empiricism and quantum mechanics which he developed especially in the 1960s In order to appreciate the celebrated work of the philosopher it is important to create an understanding of these formative years in Feyerabend's life and work Anyone who knows similar discussions like the paradigm shift of Thomas Kuhn or has a passion for history philosophy and science will be fascinated by the works of Paul Feyerabend As scientists and followers of Feyerabend Collodel and Oberheim strive to pay respect to the philosopher and to make his work accessible to a whole new generation **Structuring Sense: Volume 2: The Normal**

Course of Events Hagit Borer, 2005-01-21 *Structuring Sense* explores the difference between words however defined and structures however constructed It sets out to demonstrate over three volumes of which this is the second that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure from memory of words to manipulation of rules Its reformulation of how grammar and lexicon interact has profound implications for linguistic philosophical and psychological theories about human mind and language Hagit Borer departs from both language specific constructional approaches and lexicalist approaches to argue that universal hierarchical structures determine interpretation and that

language variation emerges from the morphological and phonological properties of inflectional material The Normal Course of Events applies this radical approach to event structure Integrating research results in syntax semantics and morphology the author shows that argument structure is based on the syntactic realization of semantic event units The topics she addresses include the structure of internal arguments and of telic and atelic interpretations accusative and partitive case perfective and imperfective marking the unaccusative unergative distinction existential interpretation and post verbal subjects and resultative constructions The languages discussed include English Catalan Finnish Hebrew Czech Polish Russian and Spanish

Semantics: Volume 2 John Lyons, 1977-10-27 This book which can be read independently deals with more specifically linguistic problems in semantics and contains substantial original material

Semantics and The Lexicon James Pustejovsky, 2012-12-06 The goal of this book is to integrate the research being carried out in the field of lexical semantics in linguistics with the work on knowledge representation and lexicon design in computational linguistics Rarely do these two camps meet and discuss the demands and concerns of each other's fields Therefore this book is interesting in that it provides a stimulating and unique discussion between the computational perspective of lexical meaning and the concerns of the linguist for the semantic description of lexical items in the context of syntactic descriptions This book grew out of the papers presented at a workshop held at Brandeis University in April 1988 funded by the American Association for Artificial Intelligence The entire workshop as well as the discussion periods accompanying each talk were recorded Once complete copies of each paper were available they were distributed to participants who were asked to provide written comments on the texts for review purposes

VII JAMES PUSTEJOVSKY 1 INTRODUCTION There is currently a growing interest in the content of lexical entries from a theoretical perspective as well as a growing need to understand the organization of the lexicon from a computational view This volume attempts to define the directions that need to be taken in order to achieve the goal of a coherent theory of lexical organization

The Semantic Web Vipul Kashyap, Christoph Bussler, Matthew Moran, 2008-09-27 The Semantic Web is a vision the idea of having data on the Web defined and linked in such a way that it can be used by machines not just for display purposes but for

automation integration and reuse of data across various applications However there is a widespread misconception that the Semantic Web is a rehash of existing AI and database work Kashyap Bussler and Moran dispel this notion by presenting the multi disciplinary technological underpinnings such as machine learning information retrieval service oriented architectures and grid computing Thus they combine the informational and computational aspects needed to realize the full potential of the Semantic Web vision **A Theory of Conventional Implicature and Pragmatic Markers in Chinese** Guangwu

Feng,2010 Conventional implicature is itself a highly controversial term understood very differently by various brands of contemporary pragmatic theory This book sets out to advance a Gricean theoretical framework of conventional implicature It also intends to offer an analysis of pragmatic markers in Chinese *Statistical Semantics* Sverker Sikström,Danilo Garcia,2020-06-08 This book discusses the application of various statistical methods to texts rather than numbers in various fields in behavioral science It proposes an approach where quantitative methods are applied to data whereas previously such data were analyzed only by qualitative research methods To emphasize the quantitative aspects of semantics and the possibilities of conducting scientific inferences the book introduces the concept of statistical semantics and presents the reader with a subset of techniques found in that domain More specifically the book focuses on methods that allow the investigation of semantic relationships between words based on empirical corpus data It shows the reader how to apply various statistical methods on texts for example statistical tests to ascertain whether two sets of text are statistically different ways to predict variables from text as well as how to summarize and graphically illustrate texts Thus the book presents an accessible hands on introduction to a selection of techniques indispensable for cognitive psychologists linguists and social psychologists **The Semantic Web - ASWC 2006** Riichiro Mizoguchi,Zhongzhi Shi,2006-08-29 This book constitutes the refereed proceedings of the First Asian Semantic Web Conference ASWC 2006 held in Beijing China in September 2006 The 36 revised full papers and 36 revised short papers presented together with three invited contributions were carefully reviewed and selected from 208 full paper submissions The papers are organized in topical sections **Case Studies of Linguistic Representations of Motion** Yo Matsumoto,2025-02-17 How languages describe spatial motion events has been a hotly discussed topic in recent years in cognitive linguistics and linguistic typology This two volume book provides new descriptions and proposals on this fascinating topic based on a large scale experimental study of motion event descriptions in almost 20 languages across the globe as part of a research project conducted by NINJAL The chapters are based on papers presented at international conferences most at NINJAL international symposium held in January 2019 some at International Cognitive Linguistics Conferences in 2017 and 2019 This volume provides valuable descriptions of familiar and unfamiliar languages as well as insightful discussions of controversial issues based on those descriptions This book would interest students in linguistics and cognitive science in Asia Pacific Europe and North America Parentetical Meaning Todor

Koev,2022-06-16 This book investigates the semantics and pragmatics of a representative sample of parentetical

constructions Todor Koev argues that these constructions fall into two major classes pure and impure Pure parentheticals comment on some part of the descriptive content of the root sentence but are otherwise relatively independent of it Impure parentheticals modify components of the illocutionary force and affect the felicity or the truth of the root sentence The book studies parentheticals from three theoretical viewpoints illocutionary effects scopal properties and discourse status It establishes and explicates the notion of parenthetical meaning in a formally precise and predictive dynamic semantic model As a result parentheticality is brought to bear on linguistic phenomena such as entailment and presupposition binding and anaphora evidentiality and modality illocutionary force and polarity
