Seminar on Algebraic Groups and Related Finite Groups Armand Borel, R. W. Carter, Charles W. Curtis, Nagayoshi Iwahori, T. A. Springer, Robert Steinberg, 2006-11-14 *Algebraic Groups* Yuri Tschinkel, 2007 **Algebras, Groups, and Geometries**, 1992 Automorphisms of Fusion Systems of Finite Simple Groups of Lie Type Carles Broto, Jesper M. Møller, Bob Oliver, 2020-02-13 For a finite group G of Lie type and a prime p the authors compare the automorphism groups of the fusion and linking systems of G at p with the automorphism group of G itself When p is the defining characteristic of G they are all isomorphic with a very short list of exceptions When p is different from the defining characteristic the situation is much more complex but can always be reduced to a case where the natural map from $\text{Out } G$ to outer automorphisms of the fusion or linking system is split surjective This work is motivated in part by questions involving extending the local structure of a group by a group of automorphisms and in part by wanting to describe self homotopy equivalences of BG_p in terms of $\text{Out } G$

Carter, Charles Curtis, 2014-09-01 Encyclopaedia of Mathematics Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977-1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details

on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques *The Cumulative Book Index* ,1971 A world list of books in the English language
