Index to Reviews, Symposia Volumes and Monographs in Organic Chemistry Norman Kharasch, Walter Wolf, Elaine C. P. Harrison, 2013-10-22 Index to Reviews Symposia Volumes and Monographs in Organic Chemistry for the Period 1940 1960 presents a resume of published monographs reviews and symposia lectures in organic chemistry The editors adopted the plan of listings by symposia volume or journal backed up by the total subject and author indexes In this way the user can readily locate a particular article through the author index or the subject index or should he recall that an article appeared in a particular source the chronological listing in that source can be scanned quickly The Index gives a convenient overview of the accomplishments of organic chemists during this very prolific period of the growth of the field Frequently several articles on the same or similar subject appear hence the historical perspective can be sensed by rapid evaluation of the reviews selected This Index will be useful to research workers teachers and students It will also assist editors and authors to select specific areas which require critical review

Elsevier's Encyclopaedia of Organic Chemistry Edith Josephy, F. Radt, 2013-12-01 When a few years ago the publication of Elsevier's Encyclopaedia of Organic Chemistry was suspended it seemed desirable to complete on account of its monographic character the steroid section in accordance with the original conception One consideration in favour thereof among others was that the steroid section of Beilstein's Handbuch will not be available for some years to come so that also to those using Beilstein the present publication is a valuable help in bridging the gap In view of the undiminished activity in this special field equally important to chemists biochemists and the medical world the hope that the completion of this section will meet the needs of a wide circle of readers appears to be justified Altogether three more volumes are planned for the Supplement the first of which now presented covers the steroid Oxocompounds the literature having been consulted up to the end of 1946 in conformity with the previous volumes of the steroid Supplement Where however important additions and corrections are concerned literature up to the most recent date has been taken into account In treating the subject matter the same principles have been followed as in the previous volumes of this section Editorship remains in the competent hands of Dr F RADT who has contributed a considerable proportion of the matter treated in this volume He is assisted by Dr A GEORG and Dr DoRA STERN
