TASTE: Why You Like What You Like Arthur Asa Berger,2023-03-07 Taste is an enigmatic topic We recognize that taste plays an important role in our life in that everything we buy and many things we do are governed by our sense of taste But what exactly is taste How do we get our sense of taste and how does it affect our everyday lives Does it evolve as we grow older or is it a constant in our lives Is it affected by all the influencers to whom we are exposed as we watch TikTok and commercials or do influencers merely spark some kind of inner sense of taste that was with us all the time Is our taste based on our social and economic status or something else What role do income and cost have in determining what we choose to buy What role do the qualities of what we buy and the choices we make shape our decisions Is taste based on logical thinking about things we wish to do or buy upon emotions we have generated by things like identification status or cultural imperatives Taste always involves some element of choice because if there is no choice taste is irrelevant or moot But what

are the determinants when we compare things to buy or get or do when we have choices to make This book takes its point of departure from the work of the French sociologist Pierre Bourdieu whose book *Distinction* is considered a classic work of sociological analysis The topics dealt with are shown in the table of contents below The book is distinctive in that it offers discussions of four methodologies theories used in discussing taste semiotics psychoanalytic theory sociological theory and Marxist theory and then applies these theories in the second part of the book to a variety of topics involving taste such as yogurt dogs the singer Celine Dion ocean cruises brands smartphones men s facial hair and so on Readers of the book will learn four methodologies they can use in analyzing taste and see how these methodologies were applied

Embodiment in the Semiotic Matrix Isaac E. Catt, 2017-09-22 Communicology is widely accepted on the international scene as a new name for the study of human communication It replaces several equivocal disciplinary conceptions such as communication which may fail to distinguish the science of communication from its object of investigation or the message centered communication studies which often obfuscates information exchange with the experience of shared meaning in human encounters Communicology differs from the American mainstream social science of communication not only because it is grounded in communication theory rather than information theory but also because it advances a philosophically informed ecological perspective on human discourse This book is intended as a contribution to the philosophy of communication and the human science of communicology Semiotic phenomenology is thoroughly described as the synthetic logic that combines a philosophy of consciousness with a science of culture and conduct to explicate the lifeworld habitus Consciousness is viewed as cultural semiotic and experience as personal phenomenological This is a reciprocal reflexive relationship in which culture is conceived as consciousness of communication and communication the manifest experience of culture The book describes embodiment so conceived including the history of the matrix idea in American pragmatism and European philosophy as they commingled in the United States to produce a unique discipline of communication the science of embodied discourse Important roots of this new discipline are described for the first time here in a unique synthesis of C S Peirce John Dewey Gregory Bateson and Pierre Bourdieu In addition the semiotic relativity hypothesis is argued to be an important implication of this new discipline Transcending the stale debate on language and thought the limited conception of linguistic relativity is considerably broadened and deepened The distinctive lifeworld of humans is argued to occur at the threshold of sign consciousness in the semiotic matrix of culture society person Semiotic phenomenology is not only a synthesis of two great European philosophical movements structuralism and phenomenology it is also the essence of American pragmatism This view culminates in the contemporary human science of communicology
