Sensing Semiosis Toward The Possibility Of Complementary Cultural Logics

Susan Petrilli, Augusto Ponzio

Sensing Semiosis Toward The Possibility Of Complementary Cultural Logics:

Sensing Semiosis Floyd Merrell,1998 He then delves into various disciplines to examine the means and methods by which we sense our physical world and how the resulting perceptions intersect with and correspond to our world of signs Drawing upon a variety of cultural phenomena and recent events that have preoccupied the media Merrell shows how we become aware of and process signs through the entire range of our sensory channels *Sensing Corporeally* Floyd Merrell,2003-01-01 Focusing on analogical sensing rather than digital reasoning Merrell argues that human sensation and cognition should be thought of in terms of continually changing signs that can be accounted for in terms of topological forms

Semiotics Unbounded Susan Petrilli,Augusto Ponzio,2005-01-01 The more human knowledge increases the more signs grow and with this expansion the more the boundaries of the science that studies signs also grows In *Semiotics Unbounded* Susan Petrilli and Augusto Ponzio explain the explosion of the sign network in the era of global communication and discuss the important theoretical responses offered by semiotics Providing a much needed introductory guide to the subject Petrilli and Ponzio explore the ever growing frontiers of semiotics through the thought of prominent sign scholars such as Charles Peirce Victoria Welby Mikhail Bakhtin Charles Morris and Thomas Sebeok In an era of global communication a global approach is necessary and what may seem to be the whole is only a part a view being at once globalizing and open Each and every sign is never self sufficient and closed but exists always in a relation of otherness This is true of the signs forming animals and human beings individuals and communities and involves the implication of all living beings in the life of all others *Semiotics Unbounded* offers a new and original survey of the science of signs evaluating it in relation to the problems of our time not only of a scientific order but also the problems concerning everyday social life **A (Bio)Semiotic Theory**

of Translation Kobus Marais,2018-10-25 This volume outlines a theory of translation set within the framework of Peircean semiotics which challenges the linguistic bias in translation studies by proposing a semiotic theory that accounts for all instances of translation not only interlinguistic translation In particular the volume explores cases of translation which does not include language at all The book begins by examining different conceptualizations of translation to highlight how linguistic bias in translation studies and semiotics has informed these fields and their development The volume then outlines a complexity theory of translation based on semiotics which incorporates process philosophy semiotics and translation theory It posits that translation is the complex systemic process underlying semiosis the result of which produces semiotic forms The book concludes by looking at the implications of this conceptualization of translation on social cultural emergence theory through an interdisciplinary lens integrating perspectives from semiotics social semiotics and development studies Paving the way for scholars to analyze translational aspects of all semiotic phenomena this volume is essential reading for graduate students and researchers in translation studies semiotics multimodal studies cultural studies and development studies

Exploring the Implications of Complexity Thinking for Translation Studies Kobus Marais,Reine

Meylaerts,2021-12-27 Exploring the Implications of Complexity Thinking for Translation Studies considers the new link between translation studies and complexity thinking Edited by leading scholars in this emerging field the collection builds on and expands work done in complexity thinking in translation studies over the past decade In this volume the contributors address a variety of implications that this new approach holds for key concepts in Translation Studies such as source vs target texts translational units authorship translatorship for research topics including translation data machine translation communities of practice and for research methods such as constraints and the emergence of trajectories The various chapters provide valuable information as to how research methods informed by complexity thinking can be applied in translation studies Presenting theoretical and methodological contributions as well as case studies this volume is of interest to advanced students academics and researchers in translation and interpreting studies literary studies and related areas

Beyond Fetishism and Other Excursions in Psychopragmatics NA NA,2022-09-24 Do the meanings of the innumerable fetish signs appearing in recent artworks depend on the senders intentions Is the meaning of postfeminist glamour the celebration of femininity that its practitioners tout to counter ersatz macho posturing To fully examine and clarify these and other issues involving gender postcolonial and artistic otherness this book argues for a more adequate view of performativity than presently available from speech act theory and certain strains of linguistic pragmatics In drawing simultaneously on Charles Sander Peirce s pragmatic analysis of signs Freudian and post Freudian psychoanalytic inquiry and radical feminist thought the concern of *Beyond Fetishism* is with the ethical and aesthetic import of the psychopragmatics resulting from this intermingling

Systemic Semiotics Piotr Sadowski,2022-09-08 Against the background of often esoteric literature in semiotics this book offers a fresh and rigorous new interpretation of how to approach the study of communication signs and meaning Grounded in a deductive theory of interacting systems Piotr Sadowski s book provides an accessible account of the hierarchy of communication Divided into two parts this book argues in the first section that a deductive semiotic theory generates communication situations of increasing complexity from contiguous communication to indirect referential forms based on indexical iconic and symbolic signs Within this system Sadowski explains how key concepts of the semiotic model such as information parainformation and metainformation can account for degrees of cognitive complexity of communication processes including the perception and interpretation of signs on literal and figurative levels After this clear step by step exposition of the theory of interacting systems *Systemic Semiotics* then explores various applications of this theory providing new insights into problems subsumed under communication studies cultural theory literary and film studies and psychology

From Interaction to Symbol Piotr Sadowski,2009-09-23 Against the background of jargon ridden and often obscure semiotic literature Sadowski s book offers a reader friendly yet rigorous account of human communication and its evolution from animal and primate behaviour What is specifically human about the way we exchange information with other people and to what extent are our facial expressions body language and even emotive elements of speech still indebted to our pre human

ancestors Why can the chimpanzees smart as they are not interpret animal tracks in the ground why did religions often ban representational art why is photography perceptually more powerful than painting how have human syntactic speech and combinatorial grammar enabled the explosion of culture and why do otherwise rational humans often strongly believe in the objective existence of unempirical virtual entities such as religious and philosophic concepts These and many other fascinating questions are addressed in the book within the methodological framework of systems theory and evolutionary psychology

The Self as a Sign, the World, and the Other Susan Petrilli, 2017-07-28 Ostentation of the Subject is a practice that is asserting itself ever more in today's world Consequently criticism by philosophers psychologists sociologists and anthropologists has been to little effect considering that they are not immune to such practices themselves The question of subjectivity concerns the close and the distant the self and the other the other from self and the other of self It is thus connected to the question of the sign It calls for a semiotic approach because the self is itself a sign its very own relation with itself is a relation among signs This book commits to developing a critique of subjectivity in terms of the material that the self is made of that is the material of signs Susan Petrilli highlights the scholarship of Charles Peirce Mikhail Bakhtin Roland Barthes Mary Boole Jacques Derrida Michael Foucault Emmanuel Levinas Claude Levi Strauss Maurice Merleau Ponty Charles Morris Thomas Sebeok Thomas Szasz and Victoria Welby Included are American and European theories and theorists evidencing the relationships interconnecting American Italian French and German scholarship Petrilli covers topics from identity issues that are part of semiotic views to the corporeal self as well as responsibility reason and freedom Her book should be read by philosophers semioticians and other social scientists

Not to Perish Lee B. Croft, Alicia C. Baehr, Patrick J. Heuer, 2008-12-01 As the co authors present 13 of American Prof of Russian Lee B Croft's scholarly articles in English with Russian examples the articles fascinate as they advance the reader's knowledge of glossolalia poetic decipherment and translation language philosophy and psychology linguistic iconicity and language universals an American Nobel laureate scientist's inspiration literary pornography pervasive triplicity spontaneous human combustion and polylingual alphamagic squares

Forging New Frontiers: Fuzzy Pioneers I Masoud Nikraves, Lofti A. Zadeh, 2007-09-27 The 2005 BISC International Special Event BISCSE 05 Forging the frontiers was held in the University of California Berkeley Where fuzzy logic began from November 3-6 2005 The successful applications of fuzzy logic and its rapid growth suggest that the impact of fuzzy logic will be felt increasingly in coming years Fuzzy logic is likely to play an especially important role in science and engineering but eventually its influence may extend much farther In many ways fuzzy logic represents a significant paradigm shift in the aims of computing a shift which reflects the fact that the human mind unlike present day computers possesses a remarkable ability to store and process information which is pervasively imprecise uncertain and lacking in categoricity The chapters of the book are evolved from presentations made by selected participants at the meeting and organized in two books The papers include reports from the different front of soft computing

in various industries and address the problems of different fields of research in fuzzy logic fuzzy set and soft computing The book provides a collection of forty four 44 articles in two volumes

Hypertext semiotics in the commercialized Internet Moritz Neumüller, 2003-04-15 Inhaltsangabe Abstract Building on approaches that have succeeded in applying semiotic principles and methodology to computer science such as computer semiotics computational semiotics and semiotic interface engineering this dissertation establishes a systematic account for those researchers who are ready to look at hypertext from a semiotic point of view Rather than a new hypertext model this work presents the prolegomena of a theory of hypertext semiotics interlacing the existing models with the findings of semiotic research on all levels of the textual aural visual tactile and olfactory channels A short history of hypertext from its prehistory to today s state of the art systems and the current developments in the commercialized World Wide Web creates the context for this approach which should be seen as a fortification of the connection between the media semiotic approach and computer semiotics While computer semioticians claim that the computer is a semiotic machine and Artificial Intelligence scientists underline the importance of semiotics for the construction of the next hypertext generation this paper makes use of a much broader methodological basis These findings are placed in the context of the commercialization of the Internet Besides identifying the main challenges for eCommerce from the viewpoint of hypertext semiotics the author concentrates on information goods and the current limitations for a new economy such as restrictive intellectual property and copyright laws A semiotic analysis of iMarketing techniques and the Toywar complete the dissertation Zusammenfassung Diese Dissertation legt einen systematischen Ansatz f r all jene Forscher dar die bereit sind Hypertext aus einer semiotischen Perspektive zu betrachten Durch die Verkn pfung existierender Hypertext Modelle mit den Resultaten aus der Semiotik auf allen Sinnesebenen der textuellen auditiven visuellen taktilen und geruchlichen Wahrnehmung skizziert der Autor Prolegomena einer Hypertext Semiotik Theorie anstatt ein v llig neues Hypertext Modell zu pr sentieren Eine Einf hrung in die Geschichte der Hypertexte von ihrer Vorgeschichte bis zum heutigen Entwicklungsstand und den gegenw rtigen Entwicklungen im kommerzialisierten World Wide Web bilden den Rahmen f r diesen Ansatz welcher als Fundierung des Br ckenschlages zwischen Mediensemiotik und Computer Semiotik angesehen werden darf W hrend Computer Semiotiker wissen dass der Computer

Trajectories of Translation Kobus Marais, 2023-06-23 This book builds on Marais s innovative A Bio Semiotic Theory of Translation to explore the implications of this conceptualization of translation as the semiotic work from which social cultural reality emerges and chart the way forward for applications in empirical research The volume brings together some of the latest developments in biosemiotics social semiotics and Peircean semiotics with emergent work in translation studies towards better understanding the emergence of trajectories in society culture through semiotic processes The book further develops lines of thinking around thermodynamics in the work of Terrence Deacon to consider the ways in which ideas emerge from matter creating meaning and its opposites namely the ways in which ideas constrain matter Marais links these theoretical strands to empirical case

studies in the final three chapters towards operationalizing these concepts for further empirical work This book is aimed at academics in the fields of translation studies semiotics multimodal multimedial studies cultural studies and development studies It will also be applicable to postgraduate students in these fields Translation Studies beyond the Postcolony Ilse Feinauer, Kobus Marais, 2017-01-06 This edited volume explores the role of postcolonial translation studies in addressing issues of the postcolony It investigates the retention of the notion of postcolonial translation studies and whether one could reconsider or adapt the assumptions and methodologies of postcolonial translation studies to a new understanding of the postcolony to question the impact of postcolonial translation studies in Africa to address pertinent issues The book also places the postcolony in historical perspective and takes a critical look at the failures of postcolonial approaches to translation studies The book brings together 12 chapters which are divided into three sections namely Africa the Global South and the Global North As such the volume is able to consider the postcolony and even conceptualisations beyond the postcolony in a variety of settings worldwide La traduzione Susan Petrilli, 2000 **Translation Translation**, 2021-07-26 Translation Translation contributes to current debate on the question of translation dealt with in an interdisciplinary perspective with implications not only of a theoretical order but also of the didactic and the practical orders In the context of globalization the question of translation is fundamental for education and responds to new community needs with reference to Europe and more extensively to the international world In its most obvious sense translation concerns verbal texts and their relations among different languages However to remain within the sphere of verbal signs languages consist of a plurality of different languages that also relate to each other through translation processes Moreover translation occurs between verbal languages and nonverbal languages and among nonverbal languages without necessarily involving verbal languages Thus far the allusion is to translation processes within the sphere of anthroposemiosis But translation occurs among signs and the signs implicated are those of the semiotic sphere in its totality which are not exclusively signs of the linguistic verbal order Beyond anthroposemiosis translation is a fact of life and invests the entire biosphere or biosemiosphere as clearly evidenced by research in biosemiotics for where there is life there are signs and where there are signs or semiotic processes there is translation indeed semiotic processes are translation processes According to this approach reflection on translation obviously cannot be restricted to the domain of linguistics but must necessarily involve semiotics the general science or theory of signs In this theoretical framework essays have been included not only from major translation experts but also from researchers working in different areas in addition to semiotics and linguistics also philosophy literary criticism cultural studies gender studies biology and the medical sciences All scholars work on problems of translation in the light of their own special competencies and interests **The Angel's Corpse** P. Colilli, 1999-10-28 With the great merit of Aristotle's Poetics poetic logic became a theoretical activity endowed with a philosophical nature allowing it to be more philosophical than the pure representation of existence Today however the theoretical status of poetic logic has

been greatly demoted The Angel s Corpse restores to poetic logic or lyric philosophy the cognitive and epistemological significance attributed to it by Aristotle The Angel s corpse the central metaphor in this restoration is a sign post beyond which there exists an uncharted terrain of human signification This terrain is expressed in terms of lyric philosophy and its universal trait is a shocking into reawakening which is linked to the dissolution of the repetitive logic of history With this book Colilli aims to bring to life the traits that are close to the Angel and which amount to a new philosophy of culture and interpretation This philosophy is free from the ideological burden of previous systems but pivots its cognito epistemological premises on the idea of reawakening

The Routledge Handbook of Translation and Politics Jonathan Evans,Fruela Fernandez,2018-04-19 The Routledge Handbook of Translation and Politics presents the first comprehensive state of the art overview of the multiple ways in which politics and translation interact Divided into four sections with thirty three chapters written by a roster of international scholars this handbook covers the translation of political ideas the effects of political structures on translation and interpreting the politics of translation and an array of case studies that range from the Classical Mediterranean to contemporary China Considering established topics such as censorship gender translation under fascism translators and interpreters at war as well as emerging topics such as translation and development the politics of localization translation and interpreting in democratic movements and the politics of translating popular music the handbook offers a global and interdisciplinary introduction to the intersections between translation and interpreting studies and politics With a substantial introduction and extensive bibliographies this handbook is an indispensable resource for students and researchers of translation theory politics and related areas

The Ecology and Semiotics of Language Learning Leo van Lier,2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time

Pathways to the Origin and Evolution of Meanings in the Universe Alexei A. Sharov,George E. Mikhailovsky,2024-03-26 Pathways to the Origin and Evolution of Meanings in the Universe The

book explains why meaning is a part of the universe populated by life and how organisms generate meanings and then use them for creative transformation of the environment and themselves This book focuses on interdisciplinary research at the intersection of biology semiotics philosophy ethology information theory and the theory of evolution Such a broad approach provides a rich context for the study of organisms and other semiotic agents in their environments This methodology can be applied to robotics and artificial intelligence for developing robust adaptable learning devices In this book leading interdisciplinary scholars reveal their vision on how to integrate natural sciences with semiotics a theory of meaning making and signification Developments in biology indicate that the capacity to create and understand signs is not limited to humans or vertebrate animals but exists in all living organisms the fact that inspired the integration of biology and semiotics into biosemiotics The authors discuss the nature of semiotic agents organisms and other autonomous goal directed units meaning signs information memory evolution and consciousness Also discussed are issues including the origin of life potential meaning and its actualization top down causality in physics and biology capacity of organisms to encode their functions the strategy of organisms to combine homeostasis with direct adaptation to new life cycle phases or new environments multi level memory systems increase of freedom via enabling constraints creative modeling in evolution and learning communication in animals and humans the origin and function of language and the distribution and transfer of life in space This is the first book on biosemiotics in its global conceptual and spatial scope Biosemiotics is presented using the language of natural sciences which supports the scientific grounding of semiotic terms Finally the cosmic dimension of life and meaning making leads to a reconsideration of ethical principles and ecological mentality here on earth and in space exploration Audience Theoretical biologists ethologists astrobiologists ecologists evolutionary biologists philosophers phenomenologists semioticians biosemioticians molecular biologists linguists system scientists and engineers
