Kavale, Steven R. Forness, 2012-12-06 The category of learning disabilities continues to be among the most contentious in special education Much of the debate and dissent emanates from a lack of understanding about its basic nature The failure to evolve a comprehensive and unified perspective about the nature of learning disabilities has resulted in the concept being lost The loss is best illustrated through the failure to answer this seemingly simple question What is a learning disability Using historical empirical theoretical conceptual and philosophical analyses this volume explores a number of problems and issues facing the field of learning disabilities The chapters cover historical influences definitional problems primary characteristics assessment practices theoretical development major themes research and measurement models and long term outcomes The goal is to explicate the nature of learning disabilities by analyzing what it was supposed to be what it has become and what it might be A predominant theme running through this text is the necessity for the field of learning disabilities to regain integrity by recapturing its essence      **Handbook of Cognitive, Social, and Neuropsychological Aspects of Learning Disabilities** Stephen J. Ceci, 2013-01-11 Recognized as the definitive reference in the field this book

Learning Disabilities and Brain Function William H.

Gaddes, 2013-04-17. Some may say that this book is long overdue; others, including myself, will state that the book appears at just the right time. The latter is likely more true for it is doubtful that many in the professions would until now link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case. As a matter of fact, there are those who deny the relationship completely. Lee Wiederholt, 1974, 1, in his short but excellent review of the historical perspectives of learning disabilities, traces the early interest in this problem to the work of Gall, 1802, and to

his successors Broca 1861 Jackson 1864 Bastian 1869 and a few others Each of these men would at the time of this writing be considered to have interests in the field of neurology although at the time of their investigations neurology per se was but a gleam in the eye of the anatomical beholder A relative detour then took place Cerebral palsy in the decades of the 1940s and 1950s caught the attention of researchers through the work of Winthrop Morgan Phelps orthopedist and George Deaver physiatrist and one or two other medically oriented individuals This was related to the writings of W J Little 1810 1894 It was however Kurt Goldstein Heinz Wemer both eminent German scientists and Alfred A Diagnosing Learning Disorders, Second Edition Bruce F. Pennington, 2008-10-17 This book has been replaced by Diagnosing Learning Disorders Third Edition ISBN 978 1 4625 3791 4 Theory and Research in Learning Disabilities J.P. Das, 2013-11-11 Although a number of books have appeared on learning disabilities we feel that the present book has two distinct features which are not found in most others It is multidisciplinary and it combines theory with practice A group of researchers from the disciplines of Psychology including medical psychology and information processing Reading Special Education and Physical Education interacted with each other before and after their presentations in a conference November 1980 at the University of Alberta Edmonton Canada and then wrote their chapters for this book We hope that their chapters were enriched by the discussions and arguments which happened in formal and informal settings during the authors stay in Edmonton Dr Leong could not attend the conference but was asked to write the introductory chapter for the book The contributors to this volume have been involved with basic research as well as with clinical and educational research in learning disabilities Some of them have a theoretical rather than a practical interest However a serious interest in a handicapping condition perhaps compels one to consider its amelioration no matter how pure is the researcher It is because of such a feeling that those who do basic research have suggested procedures for applying their findings The result is a balanced product entailing theory and practice
