Stein,2007-06-15 Insight and Imagination explores the primacy of the self in organizational research consulting and management leadership Contesting the radical dichotomy between objective and subjective understanding and the devaluation of the latter Professor Howard F Stein argues that the imagination of the observer informed by his or her unconscious can lead to a greater understanding of the psychological reality of the

workplace and in turn to better informed problem solving Insight emerges from the disciplined use of the imagination rather than its repudiation The book brings countertransference to center stage as a tool for understanding the emotional experience of organizational life and for formulating interventions One often neglected use of the imagination is the capacity to not have to know beforehand what one needs to learn what poet John Keats called negative capability Insight and Imagination proposes the use of the humanities as a means of expanding and deepening one's access to the inner life of organizations The author draws from the art created by others and from his own poetry written and often used during an organizational consultation Among the specific contexts discussed in this book are the experience of organizational downsizing helping organizations to grieve after change and loss recognizing red herrings in organizational decision making the language of organizational change recognizing hidden agendas in meetings and reflective practice in organizational life

**Lost Childhoods** Gregory J. Jurkovic, 2014-06-17 Parentification the assumption of responsibility for the welfare of family members by children and adolescents is increasing as a result of various forces both inside and outside of the family Evidence suggests that pathological parentification of children has serious consequences for them and for succeeding generations as do other forms of maltreatment This work is an exploration of the forces at work in families with parentified children and the treatment strategies that hold the promise of interrupting a cycle of destructive behaviour The author begins by guiding the reader from conceptualization to possible causes and manifestations of parentification facilitating a clear understanding of how and why this scenario is common The second part of the book builds on this foundation to introduce methods of assessment treatment and prevention This part of the text includes insights into the professional ethical and personal challenges faced by therapists who themselves have a history of pathological parentification **Kids who Run Away** Joseph Palenski, 1984 This study focuses on interviews with more than 30 young people to determine why they ran away from home Handbook of Parenting: Being and becoming a parent Marc H. most people become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of

parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny     *The Behavioral and Social Sciences and the Practice of Medicine* George U.
