Received September 25, 2003

**Abstract**—The spectrum of human antigens allows a monitoring of various pathological processes such as autoimmune disorders and tumorigenesis. Serological analysis of cDNA expression libraries (SEREX) is now used to search for new cancer-associated antigens, which are potential diagnostic markers or targets for immunotherapy of cancer. The results obtained for several solid tumors are reviewed. Groups of antigens detectable by SEREX, causes of immunogenicity of autoantigens, and prospective implication of antigens in diagnostics and monitoring of cancer are discussed.

**Key words:** autoantigens, cancer immunodiagnostics, expression libraries, cDNA.

## INTRODUCTION

Analysis of the repertoire of autoantigens may contribute to the understanding of mechanisms of various pathological processes, including autoimmune disorders and tumor transformation. Antigens changed in the course of tumor transformation may serve as diagnostic markers and targets of immune therapy.

To identify the antigens recognized by T cells, it is necessary to culture cytotoxic T cells of a patient [1]. The most convenient method to directly identify the antigens recognized by B cells is serological analysis of cDNA expression libraries (SEREX). This method has initially been proposed for a search for tumor antigens [2]. With SEREX, earlier unknown antigens have been identified in melanoma, breast cancer, colorectal cancer, Hodgkin's lymphoma, lung cancer, esophageal cancer, and several other tumors [2–5].

Here we summarize the results of our search for tumor antigens by SEREX.

## EXPERIMENTAL PROCEDURES EMPLOYED IN OUR WORK

Sera were obtained from the Division of Combined Therapy, Blokhin Cancer Research Center and the Proctological Division, Moscow Hospital no. 24. To construct cDNA expression libraries, we used RNA

isolated from colorectal cancer cell lines LoVo and SW-480 and pooled testicular RNA of healthy subjects. With these preparations, cDNA was synthesized and cloned in the  $\lambda$ -ZAP expression vector as recommended by Stratagene (United States). Immuno-screening was carried out as described earlier [5, 6]. Allogenic screening was performed using serological mini-arrays of recombinant tumor antigens (SMARTA) [9]. Phage cDNA clones were converted to pBCKMV phagemid forms by *in vivo* excision as recommended by Stratagene. Plasmid DNA was purified and sequenced with fluorescent terminators by Sanger's method on an ABI Prism automated DNA sequencer (Perkin Elmer, United States).

## SEREX ANALYSIS OF VARIOUS CANCER TYPES AND PATTERNS OF THE SEROLOGICAL RESPONSE

In SEREX, a cDNA library of a tumor is constructed with a phage expression vector. Recombinant proteins expressed on lytic infection are transferred onto a nitrocellulose membrane and incubated with autologous serum precleared of antibodies against bacterial and phage proteins. Clones displaying an immune response with a high IgG titer are selected and screened individually. Tumor specimens obtained by surgery are known to be contaminated with B cells and plasmacytes. As a result, such libraries contain

## **Serologic Analysis Of Human Cancer Antigens:**

*Serologic Analysis of Human Cancer Antigens* Steven A. Rosenberg, 1980      **Melanoma Antigens and Antibodies**  
Ralph A. Reisfeld, Soldano Ferrone, 2012-12-06 The ever expanding research on human cancer has resulted in numerous technical and conceptual advances during the last few years Serological structural and biological characterization of human melanoma constitutes one area of research that has received considerable attention from researchers and clinicians and has generated new and exciting information In this volume we have attempted to assemble work on topics that produced some of the most recent advances We asked each author to describe and interpret his most current research and whenever possible to compare and contrast it with work of other investigators in the field We have been careful not to impose our viewpoints except in contributions from our own laboratories since we want to provide the reader with as many divergent and sometimes opposing viewpoints as feasible Therefore we have not been overly concerned with overlaps in some individual topics We hope that this volume will provide the reader with a well balanced overview of current problems and ideas in a particular area of cancer research We wish to express our thanks to all contributors for their timely and very interesting manuscripts and we sincerely hope that the reader will enjoy this volume and benefit as much from it as we did R A Reisfeld S Ferrone La Jolla ix Contents CHAPTER 1 Immunogenetics of Melanoma RONALD T ACTON CHARLES M BALCH BRUCE BUDOWLE RODNEY C P Go JEFFREY M ROSEMAN SENG JAW SOONG AND BRUCE O BARGER 1 Introduction      *Journal of the National Cancer Institute* ,1981      **JNCI, Journal of the National Cancer Institute** National Cancer Institute (U.S.),1986      **Immunotherapy of Cancer** Mary L. Disis, 2007-10-28 Expert bench and clinical scientists join forces to concurrently review both the state of the art in tumor immunology and its clinical translation into promising practical treatments The authors explain in each chapter the scientific basis behind such therapeutic agents as monoclonal antibodies cytokines vaccines and T cells and illustrate their clinical manipulation to combat cancer Additional chapters address statistical analysis both of clinical trials and assay evaluations methods for the discovery of antigens adoptive T cell therapy and adaptive and innate immunity The challenges in clinical trial design the need for biomarkers of response such as novel imaging techniques and immunologic monitoring and the new advances and directions in cancer immunotherapy are also fully examined      *Tumor Markers and Tumor-associated Antigens* Bimal C. Ghosh, Luna Ghosh, 1987      **Assessment of Tumour Response** Barry W. Hancock, 1982-12-31 The assessment of tumour response after treatment is one of the most important challenges in Oncology and the picture is so often complicated by the effects of therapy itself Clinical assessment is still by far the most important method of assessment at our disposal but there is increasing dependence on investigations of all types as indices of response This dependence may be misplaced if inappropriate investigations are pursued and we have tried to emphasise in this book the importance of selectivity Some indices of assessment e g tumour markers organ imaging have a vital role to play others e g histopathology genetics are assuming greater importance as tumour behaviour

becomes better understood One subject Immunology is still in its infancy as regards tumour follow up but shows much promise so that a full account of tumour immunology and trends in immunotherapy has been included I am grateful to Dr Brian Ross for his help with the chapter on Organ Imaging to the Department of Medical Illustration for their ever ready co operation with illustrations and photographs and to Miss Shirley Francis for doing much of the typing B W HANCOCK List of Contributors HANCOCK B W MD DCH MRCP Senior Lecturer in Medicine Honorary Consultant Physician Royal Hallamshire Weston Park Hospitals Sheffield U K NEAL F E KSG MBChB FRCR DMRT Consultant Radiotherapist Oncologist Weston Park Hospital Sheffield U K POTTER AM *Published Scientific Papers of the National Institutes of Health* National Institutes of Health (U.S.),1981 Each issue lists papers published during the preceding year *Subject Index of Extramural Research Administered by the National Cancer Institute* ,1978 Current information about research grants and contracts supported by the National Cancer Institute Subject listing gives contract or grant number and topic Investigator grant number and contract number indexes *Research Awards Index* ,1979 *Immunological Approaches to Cancer Therapeutics* Enrico Mihich,1982 **Subject Index of Current Extramural Research Administered by the National Cancer Institute** ,1978 *Immunology of Malignant Diseases* V.S. Byers,R. W. Baldwin,2012-12-06 Over the past 5 years clinical immunology as a whole has advanced more rapidly than over the past 20 years Many of these advances have been due to monoclonal antibody technology with its ability to identify antigens on tumour cells with a precision never before available Monoclonal antibodies have the ability to identify subsets of human T lymphocytes and aid in diagnosis of both immunodeficiency disorders such as AIDS or autoimmune diseases and they can be adapted as drug targeting agents Additionally however major advances have been made in identifying immunomodulating agents and the last year has seen two such agents IL 2 and OKT3 made available commercially for such intervention Furthermore another immunomodulating technique bone marrow transplantation has now been established as a curative modality in leukaemia treatment A central issue in tumour immunology is whether human tumours express antigens which can be termed tumour specific This has important implications for both tumour immunity as well as drug targeting This issue is considered in detail by R A Robins in the introductory chapter in which the expression of antigens in human tumours is compared with that in experimentally induced animal tumours This controversial issue is also considered in later chapters by Bast in breast carcinoma Rimm and de Vries in melanoma Vinsky in lung cancer Armitage in colorectal cancer and Paulie and Perlmann in bladder carcinoma **Clinical Management of Malignant Melanoma** Giulio Costanzi,2012-12-06 Where do you begin to look for a recent authoritative article on the diagnosis or management of a particular malignancy The few general oncology textbooks are generally out of date Single papers in specialized journals are informative but seldom comprehensive these are more often preliminary reports on a very limited number of patients Certain general journals frequently publish good in-depth reviews of cancer topics and published symposium lectures are often the best overviews available Unfortunately these reviews and

supplements appear sporadically and the reader can never be sure when a topic of special interest will be covered Cancer Treatment and Research is a series of authoritative volumes which aim to meet this need It is an attempt to establish a critical mass of oncology literature covering virtually all oncology topics revised frequently to keep the coverage up to date easily available on a single library shelf or by a single personal subscription We have approached the problem in the following fashion First by dividing the oncology literature into specific subdivisions such as lung cancer genitourinary cancer pediatric oncology etc Second by asking eminent authorities in each of these areas to edit a volume on the specific topic on an annual or biannual basis Each topic and tumor type is covered in a volume appearing frequently and predictably discussing current diagnosis staging markers all forms of treatment modalities basic biology and more

Protides of the Biological Fluids H. Peeters, 2014-11-26 Protides of the Biological Fluids Proceedings of the 30th Colloquium 1982 is a collection of manuscripts presented at the 30th Colloquium held in Brussels Belgium in 1982 This text is organized into three sections encompassing 160 chapters The first section highlights the mechanisms of the normal and abnormal mental function through evaluation of neuroproteins or the so called think proteins This section describes the manifestations clinical features diagnosis and therapeutic options of nervous system diseases The second section tackles monoclonal proteins as a reagent to detect antigens This section deals with the significant progress in cancer therapy and the binding of cytotoxic drugs to monoclonal antibodies The third section considers the potential of isodalt electrophoresis and high pressure liquid chromatography with particular emphasis on their application to protein analysis in biological fluids This book will be of great value to biochemists clinical chemists and clinicians

**Cancer and Autoimmunity** M.E. Gershwin, Yehuda Shoenfeld, 2000-03-27 Of the two disciplines in parallel development for two decades tumor immunology and transplantation immunology the latter has thrived and has led to some of the most critical discoveries in immunobiology The former continues to thwart both scientists and clinicians alike The goal of immunologists in modern day research is to develop a simple and effective means to manipulate cancer in vivo possibly encompassing several venues identifying a phenotypic marker and the use of either active or passive immunization include the use of passive reagents carrying warheads to selectively destroy cancer cells or altering the basic process of cell survival This excellent multidiscipline authored volume presents a theme which has not been well described before The papers include both basic and clinical science and range from sophisticated molecular biology to little more than phenomenology e g the increased association of cancer in some autoimmune diseases and increased presentation of autoimmune phenomena in malignant condition This however is state of the art This collection of themes will be of use not only to bench scientists but also to clinicians who treat patients The book represents progress at the cutting edge of this discipline and points the way to further developments in the black box of immunology

**Adoptive Immunotherapy** Burkhard Ludewig, Matthias W. Hoffmann, 2008-02-02 An authoritative collection of optimal techniques for producing and characterizing the immunologically active cells and effector molecules

now gaining wide use in the clinical treatment of patients Taking advantage of the latest technologies the authors present readily reproducible experimental protocols for the study of dendritic cells T cells monoclonal antibodies and bone marrow transplantation The emphasis is on preclinical and clinical applications and on the progress of selected approaches in clinical trials Additional chapters cover the molecular definition of target antigens mathematical modeling approaches to immunotherapy and the utilization of regulatory T cells The protocols make it possible to study the adoptive transfer of tailored antigen specific immune cells and to improve the clinical application of adoptive immunotherapy

Serologic Analysis Of Human Cancer Antigens: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the captivating narratives that have enthralled audiences this year. Serologic Analysis Of Human Cancer Antigens : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Serologic Analysis Of Human Cancer Antigens : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.

### **Serologic Analysis Of Human Cancer Antigens Introduction**

Free PDF Books and Manuals for Download: Unlocking Knowledge at Your Fingertips In today's fast-paced digital age, obtaining valuable knowledge has become easier than ever. Thanks to the internet, a vast array of books and manuals are now available for free download in PDF format. Whether you are a student, professional, or simply an avid reader, this treasure trove of downloadable resources offers a wealth of information, conveniently accessible anytime, anywhere. The advent of online libraries and platforms dedicated to sharing knowledge has revolutionized the way we consume information. No longer confined to physical libraries or bookstores, readers can now access an extensive collection of digital books and

manuals with just a few clicks. These resources, available in PDF, Microsoft Word, and PowerPoint formats, cater to a wide range of interests, including literature, technology, science, history, and much more. One notable platform where you can explore and download free Serologic Analysis Of Human Cancer Antigens PDF books and manuals is the internet's largest free library. Hosted online, this catalog compiles a vast assortment of documents, making it a veritable goldmine of knowledge. With its easy-to-use website interface and customizable PDF generator, this platform offers a user-friendly experience, allowing individuals to effortlessly navigate and access the information they seek. The availability of free PDF books and manuals on this platform demonstrates its commitment to democratizing education and empowering individuals with the tools needed to succeed in their chosen fields. It allows anyone, regardless of their background or financial limitations, to expand their horizons and gain insights from experts in various disciplines. One of the most significant advantages of downloading PDF books and manuals lies in their portability. Unlike physical copies, digital books can be stored and carried on a single device, such as a tablet or smartphone, saving valuable space and weight. This convenience makes it possible for readers to have their entire library at their fingertips, whether they are commuting, traveling, or simply enjoying a lazy afternoon at home. Additionally, digital files are easily searchable, enabling readers to locate specific information within seconds. With a few keystrokes, users can search for keywords, topics, or phrases, making research and finding relevant information a breeze. This efficiency saves time and effort, streamlining the learning process and allowing individuals to focus on extracting the information they need. Furthermore, the availability of free PDF books and manuals fosters a culture of continuous learning. By removing financial barriers, more people can access educational resources and pursue lifelong learning, contributing to personal growth and professional development. This democratization of knowledge promotes intellectual curiosity and empowers individuals to become lifelong learners, promoting progress and innovation in various fields. It is worth noting that while accessing free Serologic Analysis Of Human Cancer Antigens PDF books and manuals is convenient and cost-effective, it is vital to respect copyright laws and intellectual property rights. Platforms offering free downloads often operate within legal boundaries, ensuring that the materials they provide are either in the public domain or authorized for distribution. By adhering to copyright laws, users can enjoy the benefits of free access to knowledge while supporting the authors and publishers who make these resources available. In conclusion, the availability of Serologic Analysis Of Human Cancer Antigens free PDF books and manuals for download has revolutionized the way we access and consume knowledge. With just a few clicks, individuals can explore a vast collection of resources across different disciplines, all free of charge. This accessibility empowers individuals to become lifelong learners, contributing to personal growth, professional development, and the advancement of society as a whole. So why not unlock a world of knowledge today? Start exploring the vast sea of free PDF books and manuals waiting to be discovered right at your fingertips.

## FAQs About Serologic Analysis Of Human Cancer Antigens Books

1. Where can I buy Serologic Analysis Of Human Cancer Antigens books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Serologic Analysis Of Human Cancer Antigens book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Serologic Analysis Of Human Cancer Antigens books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Serologic Analysis Of Human Cancer Antigens audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Serologic Analysis Of Human Cancer Antigens books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
