## **Sex Work Mobility And Health In Europe:**

*Sex Work, Mobility & Health* Sophie Day, Helen Ward, 2014-06-03 First published in 2004 Major changes have taken place in the sex industry in Europe Over the past decade we have seen increasing migration and diversification along with major shifts in policy towards the industry There is very little published on sex work in Europe but the demand is growing for information and analyses of the situation today from people working on health policy gender and employment The authors of this book examine sex work in terms of economic and social restructuring concerns about infection and recent policy developments on prostitution *Prostitution Policy in the Nordic Region* May-Len Skilbrei, Charlotta Holmström, 2016-04-08

There is great interest internationally in the development of prostitution policies in the Nordic countries after Sweden Norway and Iceland have introduced general bans against buying sex whilst selling sex remains legal In addition there is a partial ban against buying sex in Finland This is a different approach from that of several other European countries where we have seen a decriminalisation of third party involvement in prostitution as well as to that of the USA which criminalises both the buying and selling of sexual services Thus the Nordic countries are often treated as representatives of a Nordic model of prostitution policies In this book the first on the subject Skilbrei and Holmström argue that these models of policies or policy regimes tend to ignore the trajectories contexts and consequences of the full range of approaches to prostitution thus they are too simplistic and static Prostitution policies in the Nordic countries are multifaceted and dynamic and cannot be represented as following a straight path and detached from empirical contexts Their analysis treats Nordic prostitution policies both as a product of history of current national and Nordic debates and of international obligations and changes in the international and national prostitution markets Furthermore they argue that a broad understanding of the relevant context is necessary so as to place Nordic prostitution policies within broader policy concerns related to gender class ethnicity sexuality social welfare immigration and organised crime as well as to neoliberal forms of governance **HIV**

**Epidemics in the European Region** Lucy Platt, Emma Jolley, Vivian Hope, Alisher Latypov, Peter Vickerman, Ford Hickson, Lucy Reynolds, Tim Rhodes, 2015-02-12 This report describes the dynamics of HIV epidemics among vulnerable and high risk populations in the European region in particular people who inject drugs sex workers and men who have sex with men It aims to inform future HIV responses and guide HIV prevention surveillance and research **On the Game** Sophie

Day, 2007-06-20 Winner of the Eileen Basker Prize and the Wellcome Medal for Anthropology as Applied to Medical Problems *On the Game* is an ethnographic account of prostitutes and prostitution Sophie Day has followed the lives of individual women over fifteen years and her book details their attempts to manage their lives against a backdrop of social disapproval The period was one of substantial change within the sex industry Through the lens of public health economics criminalisation and human rights Day explores how individual sex workers live in public and in private This offers a unique perspective on contemporary capitalist society that will be of interest both to a broad range of social scientists The author brings a unique

perspective to her work as both an anthropologist and the founder of the renowned Praed Street Project set up in 1986 as a referral and support centre for London prostitutes      Demanding Sex: Critical Reflections on the Regulation of Prostitution

Marina Della Giusta, 2016-05-13 Interrogating supply demand from an inter and multi disciplinary perspective this collection broadens engagement beyond the routine analysis of the locus of violence in prostitution and the validity of the prostitute's consent. A focus on the supply demand dynamic brings into play a range of other societal economic and psychological factors such as the social construction of sexuality the viability of alternative choices for prostitutes and clients and the impact of regulatory regimes on the provision of sexual services. The factors which underlie each component of the supply demand dyad are also studied and an examination is made of their dynamic interrelation. The collection emphasizes the importance of rendering policy makers alert to the evidence emerging from empirical studies conducted in different fields of enquiry in the hope of moving beyond polarity and politics at the local national and international level      **Sex Work** Teela

Sanders, 2013-01-11 This is a richly detailed account of the way the sex industry works and one of the few empirical studies that investigates the off street industry in Britain. The book seeks to advance a greater knowledge of the social organisation of the sex industry by uncovering the day to day activities of women involved in the indoor markets. What types of occupational risks do women experience in work of this kind? How do these hazards affect their personal lives? A key concern throughout the book is to assess whether women are passive victims of the circumstances of prostitution or whether they understand and calculate their responses to danger. Drawing upon both sociological and criminological theories and on detailed research in the city of Birmingham the author addresses these questions by estimating the rationality of those responses and by providing a measure of how women make sense of different risks. **Sex Work a risky business** describes how women create complex psychological and emotional techniques to maintain their sanity while selling sex and goes on to argue that the indoor sex markets in Britain have a distinct occupational culture with a set of social norms code of conduct and moral hierarchies that make it a high regulated workplace despite its illicit and sometimes illegal nature      Violence

and Sex Work in Britain Hilary Kinnell, 2013-01-11 This book is concerned with violence in the sex industry. It aims to provide an understanding of the nature of violence against sex workers and the relationship between violence government legislation and policy and law enforcement practices an essential task in view particularly of the 2006 Ipswich murders and the public and media response to this which illustrated how poorly the context of violence in the sex industry is understood. The book describes the incidence of violence against sex workers culminating in some cases in murder. It shows how the risk of violence is strongly dependent on the physical and legal context in which sex workers operate how repressive policing tactics exacerbate vulnerability and how discourses of abhorrence towards sex work promote perceptions of sex workers as worthless human beings. It also examines how inadequacies in the criminal justice system lead to failures in investigations and prosecutions and failures to prevent violence from known offenders and how the stereotyping of sex workers their clients

and perpetrators of violence in the media and in other spheres of academic debate distorts reality leading to inappropriate or harmful public responses

gender based violence occurs in all societies irrespective of the level of development or cultural setting whether in conflict or peacetime the challenges for legal responses to gender based violence are particularly acute in Asia This book addresses the lack of academic discourse on gender based violence in Asia beyond domestic violence by demonstrating that gendered violence exists within many different contexts and is perpetuated by multiple actors Bringing together scholars legal practitioners and human rights advocates the book examines the intersections between gender violence and the state in Asian contexts It considers the role of state institutions in perpetuating and preventing violence based on gender and identity and thus contributes to growing scholarship around due diligence standards under international law Analyzing both physical and structural gender based violence it scrutinizes how such violence exists within a landscape shaped by distinct cultural norms laws and policies and grapples with how to practically translate international human rights standards about state responsibility into these complex domestic environments Contributors from diverse backgrounds draw on case studies and empirical research to ground this academic scholarship in lived experiences of individuals and their communities in Asia By bridging the divide between policy laws and practice to offer a unique insight into both theoretical and practical responses to how gender based violence is understood within communities and state institutions in Asian countries this book will appeal to students and scholars of Asian studies Gender Studies and Law
