discourse anaphora from a purely pragmatic account to a cognitive account in terms of processing procedures Mira Ariel defines referring expressions as markers signalling the degree of Accessibility in memory of the antecedent The notion of Accessibility is explicitly defined the crucial factors being the Salience of the antecedent and the Unity between the antecedent and the anaphor This analysis yields an astonishing array of new results The precise distribution of referring expressions in actual discourse is directly predicted Several universals of anaphoric relations are stated Thus although not all languages necessarily have the same markers and nor do they assign them precisely the same function Ariel shows that they all obey the same Accessibility marking hierarchy This book will be compulsory reading for anyone with an interest in the semantics and pragmatics of referring expressions in the interaction of semantics and pragmatics and more generally in the interaction between peripheral and central cognitive systems **Routledge Library Editions: Linguistics**
