**Gods of Love and Ecstasy** Alain Daniélou, 1992-05 Daniélou examines the earliest traditions of the Hindu and Greek gods of magical power ecstatic sexuality and transcendence

**Relational Being** Kenneth J. Gergen, 2009-07-30 This book builds on two current developments in psychology scholarship and practice The first centers on broad discontent with the individualist tradition in which the

rational agent or autonomous self is considered the fundamental atom of social life Critique of individualism spring not only from psychologists working in the academy but also from communities of therapy and counseling The second and related development from which this work builds is the search for alternatives to individualist understanding Thus therapists such as Steve Mitchell along with feminists at the Stone Center expand the psychoanalytic tradition to include a relational orientation to therapy The present volume will give voice to the critique of individualism but its major thrust is to develop and illustrate a far more radical and potentially exciting landscape of relational thought and practice that now exists Most existing attempts to build a relational foundation remain committed to a residual form of individualist psychology The present work carves out a space of understanding in which relational process stands prior to the very concept of the individual More broadly the book attempts to develop a thoroughgoing relational account of human activity In doing so Gergen reconstitutes the mind as a manifestation of relationships and bears out these ideas in a range of everyday professional practices including family therapy collaborative classrooms and organizational psychology

**The Trauma Myth: The Truth about the Sexual Abuse of Children[~"and Its Aftermath** Susan A. Clancy, 2010-05 Few would argue that the experience of sexual abuse is deeply traumatic for a child But in this explosive new book psychologist Susan Clancy reports on years of research and contends that it is not the abuse itself that causes trauma but rather the narrative that is later imposed on the abuse experience Clancy demonstrates that the most common feeling victims report is not fear or panic but confusion Because children don't understand sexual encounters in the same ways adults do they normally accommodate their perpetrators something they feel intensely ashamed about as adults The professional assumptions about the nature of childhood trauma can harm victims by reinforcing these feelings Survivors are thus victimized not only by their abusers but also by the industry dedicated to helping them Path breaking and controversial The Trauma Myth empowers survivors to tell their own stories and radically reshapes our understanding of abuse and its aftermath
