Cassidy-Eagle,Laura B. Dunn,2025-09-15 Drawing on the experience of authors who conduct work in psychiatric and medical clinics for geriatric patients in both inpatient and outpatient and private practice settings Tuning In The Art and Science of Psychotherapy in Older Adults is an expert guide on addressing common real world scenarios that present themselves for treatment in this population Without discounting the value of evidence based treatments for specific pathologies it emphasizes the importance of advanced clinical interviewing skills for truly understanding patients

backgrounds concerns and goals for treatment Filled with case vignettes the book opens with an overview of numerous therapeutic modalities including cognitive behavioral therapy motivational interviewing dialectical behavior therapy and group therapies and their use with older adults It goes on to consider Factors that impact clinical presentation and care including cognitive functioning socioeconomic status structural racism and social determinants of health Adopting a transdiagnostic and integrative psychotherapy approach when working with older patients Common life challenges encountered by clinicians including new onset alcohol and substance use grief and bereavement and cognitive dysfunction Current therapeutic approaches including the use of telehealth and digital tools interventions in primary care and psychological wellness groups Accessible wide ranging and rooted in real world experience this volume provides readers with the guidance they need to effectively communicate with patients in a way that is understandable and motivating The information included in this guide will help clinicians as they make patients and their families feel understood respected and hopeful about the goals of treatment

Politics and Sex Edna Keeble, 2016-05-02 Starting with the feminist insight that the personal is political this engaging text underscores the centrality of gender and sexuality to the discipline of political science and encourages inquiry into the gendered dynamics at work in contemporary politics *Politics and Sex* problematizes the public private distinction arguing that the way power is exercised over female sexuality and reproduction results in the restriction of women's public roles allowing gender inequality to persist in many areas With topics as diverse as body politics the veiling of women female genital mutilation rape and sexual violence pornography and prostitution and trafficking the text explores significant cases in the contemporary context and ultimately repositions the private as a site of power Edna Keeble takes a much needed feminist liberal perspective through which readers can engage with questions of gender culture public policy and human rights Each chapter is rich with pedagogical features including lists of recommended films video clips websites and additional readings Interdisciplinary in nature this text is a welcome resource for students and scholars interested in exploring topics in gender and sexuality not commonly covered in political science courses

Cancer and Sexual Health John P Mulhall, Luca Incrocci, Irwin Goldstein, Ray Rosen, 2011-04-23 The average physician and even cancer care givers are not knowledgeable about the effects of cancer treatment on sex and reproductive life They are even less aware of the options available for treatment of such patients *Cancer and Sexual Health* fills a great need for a reference work devoted to the link between cancer and human sexuality The volume is designed to give a comprehensive and state of the art review of the sexual and reproductive consequences of cancer diagnosis and treatment It will prove an invaluable resource for those clinicians caring for cancer patients as well as acting as a reference text for the sexual medicine clinician who may not see a large number of cancer patients
