efforts fail to make an impact and arguably are becoming less and less successful Why would this be The answer lies in our evolutionary history Leadership is integral to our success and evolution as a species as larger better functioning groups out survived fragmented groups that did not benefit from strong leadership Leader follower relationships are therefore deeply ingrained in our brains our instincts and our behaviour But our modern world with its technology connectedness and complexity has evolved much faster than our brains and our leader follower behaviour has not caught up Evolve charts the fascinating development of our evolutionary history to provide a profound understanding of human behaviour around leadership It also establishes a framework for the modes of leadership that shape the world today Through case studies and real world examples you will gain powerful insights into the nature of leadership now More importantly these insights inform the actions you can take in your own life to enable you to become a more aware mindful impactful and successful leader
