Film and the American Presidency Jeff Menne,Christian B. Long,2015-02-20 The contention of Film and the American Presidency is that over the twentieth century the cinema has been a silent partner in setting the parameters of what we might call the presidential imaginary This volume surveys the partnership in its longevity placing stress on especially iconic presidents such as Lincoln and FDR The contributions to this collection probe the rich interactions between these high institutions of culture and politics Hollywood and the presidency and argue that not only did Hollywood acting become an idiom for presidential style but that Hollywood early on understood its own identity through the presidency s peculiar mix of national epic and unified protagonist Additionally they contend that studios often made their films to sway political outcomes that the performance of presidential personae has been constrained by the kinds of bodies for so long white and male that have occupied the office such that presidential embodiment obscures the body politic and that

Steven M. Chermak, 2002 This provocative volume thoroughly examines the ways in which the media demonized militia groups following the devastating bombing of the Alfred F Murrah building in Oklahoma City Using quantitative and qualitative research methods Steven M Chermak offers a fresh perspective on how news coverage and popular entertainment transformed a largely overlooked movement into a symbol for this new threat of domestic terrorism and ignited a national panic over the militia menace Searching for a Demon describes the representation of the militia movement in the news media editorial cartoons films and television Chermak delves into such topics as the type and amount of coverage after the blast how social problems are constructed in the news the motivations and biases of authoritative or celebrity figures used as news sources and why images of militias were framed in specific ways Chermak balances his account with an in depth look at the philosophies activities and strategies of militia groups Drawing on extensive interviews he conducted at gun shows and preparedness exhibitions the author compares and contrasts media depictions of militia life and ideology with the firsthand accounts of members and leaders themselves and he assesses how media coverage affected changes in the movement In conclusion Chermak discusses the parallels between media treatment of militias in the wake of the Oklahoma City bombing and the coverage of the al Qaeda terrorist network after the September 11 2001 attacks Solidly grounded in social constructionist theory Searching for a Demon fills a significant gap in the literature on terrorism as well as on the roles of the news media and popular culture in reshaping the public consciousness after dramatic crimes *New York Magazine*
