Neurodiversity Thomas Armstrong,2010-09-07 A new term has emerged from the disability movement in the past decade to help change the way we think about neurological disorders Neurodiversity ADHD Dyslexia Autism The number of categories of illnesses listed by the American Psychiatric Association has tripled in the past fifty years With so many people affected by our growing culture of disabilities it no longer makes sense to hold on to the deficit ridden idea of neuropsychological illness With the sensibility of Oliver Sacks and Kay Redfield Jamison psychologist Thomas Armstrong offers a revolutionary perspective that reframes many neuropsychological disorders as part of the natural diversity of the human brain rather than as definitive illnesses Neurodiversity emphasizes their positive dimensions showing how people with ADHD bipolar disorder and other conditions have inherent evolutionary advantages that matched with the appropriate environment or ecological niche can help them achieve dignity and wholeness in their lives *The Power of Neurodiversity*

Thomas Armstrong, 2011-10-04 Develop a new understanding of neurodivergence with this thoughtful exploration of the human mind from a bestselling author and psychologist From ADHD and dyslexia to autism the number of diagnosis categories listed by the American Psychiatric Association has tripled in the last fifty years With so many people affected it is time to revisit our perceptions of people with disabilities Bestselling author psychologist and educator Thomas Armstrong illuminates a new understanding of neuropsychological disorders He argues that if they are a part of the natural diversity of the human brain they cannot simply be defined as illnesses Armstrong explores the evolutionary advantages special skills and other positive dimensions of these conditions A manifesto as well as a keenly intelligent look at disability The Power of Neurodiversity is a must for parents teachers and anyone who is looking to learn more about neurodivergence
