and many more They discuss them through the various lenses of philosophy historicism psychoanalysis gender studies cosmography geography sexuality linguistics environmentalism feminism and robotics to provide new and nuanced readings of the intersectional terms of both meaning and matter Approaching nature in all its multiplicity this collection sets out to examine the divergent and complex ways in which the human and non human worlds intersect and the development of a language of symbiosis that attempts to both control and create the terms of human authority It offers an entirely new approach to the subject of nature bringing together disparate methods that have previously been pursued independently to offer a shared investment in the intersections between the human and non human worlds and how these discourses shape and condition the emotional organic cultural and psychological landscapes of Shakespeare s play worlds
