Marias Comet:

Maria's Comet Deborah Hopkinson, 2013-07-23 Maria longs to be an astronomer wish that burns as brightly as a star But girls in the nineteenth century don't grow up to be scientists especially those who are needed at home Each night when her papa sweeps the sky with his telescope Maria sweeps the floor below imagining all the strange worlds he can travel to from the rooftop of their Nantucket home Then one night Maria finally gets her chance to look through her papa's telescope For the first time she beholds the night sky stretching endlessly above her and her dream of exploring the comets and constellations seems close enough to touch Loosely based on the childhood of Maria pronounced ma RYE ah Mitchell America's first woman astronomer and illuminated by Deborah Lanino's star swept illustrations here is an exquisitely told story of a girl who yearns for adventure beyond her limited circumstances and sets out to follow her heart *Maria Mitchell and the Sexing of Science* Renée L. Bergland, 2008 New England blossomed in the nineteenth century producing a crop of distinctively American writers along with distinguished philosophers and jurists abolitionists and scholars A few of the female stars of this era Emily Dickinson Margaret Fuller and Susan B Anthony for instance are still appreciated but there are a number of intellectual women whose crucial roles in the philosophical social and scientific debates that roiled the era have not been fully examined Among them is the astronomer Maria Mitchell She was raised in isolated but cosmopolitan Nantucket a place brimming with enthusiasm for intellectual culture and hosting the luminaries of the day from Ralph Waldo Emerson to Sojourner Truth Like many island girls she was encouraged to study the stars Given the relative dearth of women scientists today most of us assume that science has always been a masculine domain But as Renee Bergland reminds us science and humanities were not seen as separate spheres in the nineteenth century indeed before the Civil War women flourished in science and mathematics disciplines that were considered less politically threatening and less profitable than the humanities Mitchell apprenticed with her father an amateur astronomer taught herself the higher math of the day and for years regularly swept the clear Nantucket night sky with the telescope in her rooftop observatory In 1847 thanks to these diligent sweeps Mitchell discovered a comet and was catapulted to international fame Within a few years she was one of America's first professional astronomers as computer of Venus a sort of human calculator for the U S Navy's Nautical Almanac she calculated the planet's changing position After an intellectual tour of Europe that included a winter in Rome with Sophia and Nathaniel Hawthorne Mitchell was invited to join the founding faculty at Vassar College where she spent her later years mentoring the next generation of women astronomers Tragically opportunities for her students dried up over the next few decades as the increasingly male scientific establishment began to close ranks Mitchell protested this cultural shift in vain The woman who has peculiar gifts has a definite line marked out for her she wrote and the call from God to do his work in the field of scientific investigation may be as imperative as that which calls the missionary into the moral field or the mother into the family The question whether women have the capacity for original investigation in science is simply idle until

equal opportunity is given them In this compulsively readable biography Renee Bergland chronicles the ideological academic and economic changes that led to the original sexing of science now so familiar that most of us have never known it any other way The best thing in its line since Dava Sobel s *Longitude* Maria Mitchell and the Sexing of Science tells a great if too little known story of an intellectual woman in 19th century New England And it is beautifully told I simply could not put it down Anyone who cares about women s education in America should read this compelling and indispensable book Robert D Richardson author of *Henry Thoreau A Life of the Mind* Emerson The Mind on Fire and William James In the Maelstrom of American Modernism Renee Bergland recounts the story of Maria Mitchell s life and work in glorious and careful detail One feels and hears the sounds of Mitchell s native Nantucket her adopted Vassar and comes to understand how one of the gentler sex advanced astronomy in her day Londa Schiebinger author of *Has Feminism Changed Science* *Maria's Comet* Deborah Hopkinson,2003-02-01 As a young girl budding astronomer Maria Mitchell dreams of searching the night sky and some day finding a new comet **American Women Achievers, Grades 3 - 5** Wheeler,2008-08-28 Invite students of varying reading levels in grades 3 5 to enjoy 40 high interest biographies using American Woman Achievers Each text is presented at two reading levels and each version of the text includes a set of comprehension questions and a bonus activity Comprehension skills include finding the main idea reading for details sequencing using context clues and drawing conclusions This 128 page book has mixed format questions writing extensions an assessment grid and reproducible pages It supports NCSS standards and aligns with state national and Canadian provincial standards Maria Mitchell Beatrice Gormley,2004 A biography of the first female science professor at Vassar College and the first American woman astronomer **The Great Comet of 1680** Howard Robinson,1916 Exploring Values Through Literature, Multimedia, and Literacy Events Patricia Ruggiano Schmidt,Ann Watts Pailliotet,2008-09-01 Exploring Values Through Multimedia Literature and Literacy Events was written by teachers and educational researchers for classrooms and schools interested in developing learning communities that develop critical and compassionate future citizens Through the use of specific multimedia literature and literacy events this book presents numerous ways for classroom teachers and schools to promote respectful responsible caring and sharing students in a democratic society Beginning with Plato s message that we cannot let the formation of good citizens to chance Exploring Values Through Multimedia Literature and Literacy Events takes the reader through a brief history of character education and moral development and a summary of multimedia s impact on our lives The chapters that follow are devoted to teacher tested classroom and school programs activities and resources for the understanding of diverse human perspectives Included in several chapters are the unique ways classes might analyze how and why information is presented in the media Due to the constant media bombardment on our lives the goal if this volume is to support our students as they discern the meanings of truth and justice *Who's Who In The Moon* Brian Jones,2024-12-30 *Who s Who in the Moon* is aimed not only at the beginner or near beginner but also at the backyard astronomer who is

perhaps experienced in other areas of observation but who has decided to spend more time considering the Moon as an alternative target. The book provides a visual introduction to our closest celestial neighbor opening with an introductory section which details both with the history of lunar mapping and naming of lunar formations as well as providing useful information on observing the lunar surface and what observers can realistically expect to see when they look at the Moon with the naked eye, binoculars or a small medium telescope. The introductory section is followed by a lengthy series of images including not only wide field panoramic views but also a large number of more detailed images showing close up views of different areas of the Moon and featuring individual craters, mountains, valleys and much more. Many of the individual features shown on these images are identified by name and are accompanied by biographical sketches relating to the men and women after whom they are named. This is a non-technical up close and personal visual look at the Earth's only natural satellite and many of the individual features scattered across its surface. Rather than offering itself as a full and exhaustive guide to the lunar surface, *A Guide to the Moon* is more of a *vade mecum* which enables and hopefully encourages the reader to become more acquainted with the lunar landscape on a personal level with a view to learning more about the astronomers and other scientists whose names are immortalised by having lunar features named after them. *Who's Who in the Moon* was inspired by and is a tribute to a Memoir published by the British Astronomical Association (BAA) in 1938 entitled *Who's Who in the Moon* written by Mary Evershed, the first Director of the BAA Historical Section. The biographical notes in *A Guide to the Moon* include examples of those penned by Mary Evershed in her original publication.

The Routledge History of the Domestic Sphere in Europe Joachim Eibach, Margareth Lanzinger, 2020-12-29 This book addresses the multifaceted history of the domestic sphere in Europe from the Age of Reformation to the emergence of modern society. By focusing on daily practice, interaction and social relations, it shows continuities and social change in European history from an interior perspective. *The Routledge History of the Domestic Sphere in Europe* contains a variety of approaches from different regions that each pose a challenge to commonplace views such as the emergence of confessional cultures of private life and of separate spheres of men and women. By analyzing a plethora of manifold sources including diaries, court records, paintings and domestic advice literature, this volume provides an overview of the domestic sphere as a location of work and consumption, conflict and cooperation, emotions and intimacy and devotion and education. The book sheds light on changing relations between spouses, parents and children, masters and servants or apprentices and humans and animals or plants, thereby exceeding the notion of the modern nuclear family. This volume will be of great use to upper level graduates, postgraduates and experienced scholars interested in the history of family, household, social space, gender, emotions, material culture, work and private life in early modern and nineteenth century Europe.
