Law of the Sea The work will be useful to anyone concerned with law of the sea in general and the evolving attitudes of States near China in particular *China's Maritime Gray Zone Operations* Andrew S. Erickson, Ryan D. Martinson, 2019-03-15 China's maritime gray zone operations represent a new challenge for the U.S. Navy and the sea services of our allies, partners and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a war without gunsmoke. Already winning in important areas, China could gain far more if left unchecked. One of China's greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world's leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China's paranaul expansion operating in the gray zone between war and peace. The book covers China's major maritime forces beyond core gray-hulled Navy units with particular focus on China's second and third sea forces, the white-hulled Coast Guard and blue-hulled Maritime Militia. Increasingly, these paranaul forces and the gray zone in which they typically operate are on the frontlines of China's seaward expansion. *China's Marine Legal System and the Law of the Sea* Keyuan Zou, 2005-06-01 Being one of the largest coastal States in the world, China's marine legal system is significant in the overall development of the international law of the sea. This book focuses on the establishment and development of China's marine legal system in the context of the new law of the sea centered on the 1982 United Nations Convention on the Law of the Sea which China ratified in 1996. It consists of five parts concerning respectively a general survey of China's marine legal system, navigation and maritime security, marine resources management, marine environmental protection and marine scientific research. China's basic marine laws and regulations are discussed and assessed in detail throughout the book. The book is of interest to lawyers, whether practicing or academic, officials in national governments and international organizations, and students and scholars in academia who are interested in international law, international relations and ocean affairs. *China's Policy towards the South China Sea* Lingqun Li, 2018-02-19 This book provides an explanation of Chinese policy towards the South China Sea and argues that this has been sculpted by the changing dynamics of the law of the sea in conjunction with regional geopolitical flux. The past few decades have witnessed a bifurcated trend in China's management of territorial disputes. Over the years, while China gradually calmed and settled most land border disputes with its neighbors, disputes on the ocean frontier continued to simmer in a seething cauldron. China's Policy towards the South China Sea attributes the distinctive path of China's approach to maritime disputes to a unique factor, the law of the sea (LOS), as the rules of the road in the ocean. By deconstructing the concept of sovereignty and treating the LOS as an evolving regime, the book examines how the changing dynamics of the LOS regime have complicated and reshaped the nature and content of sovereign disputes in the ocean regime as well as the options of settlement. Applying the findings to the South China Sea case, the author traces the learning curve on which China has embarked to comprehend the complexity of the dispute accordingly and finds that it is the dynamic interaction of the law of the sea regime and the

geopolitical conditions that has driven the evolution of China's South China Sea policy. This book will be of great interest to students of Chinese and Asian politics, international law, international relations, and security studies. Research On China's Strategy And Policy In Northeast Asia Qingcai Liu, 2024-11-27. This book offers a comprehensive in-depth and systematic analysis of China's strategy and policy in Northeast Asia. It examines the region's political, economic, security-related, and cultural dynamics with a focus on key issues and territorial sovereignty disputes. The research integrates theoretical, applied, strategic, and policy-based research methods to provide a multifaceted perspective. The analysis is framed through the lens of major country diplomacy with Chinese characteristics and China's foreign policy towards Northeast Asia. This book explores China's strategic vision for Northeast Asia, emphasizing the evolving international system in the region and China's strategic responses. It argues for the establishment of a new order of international relations in Northeast Asia, characterized by equality, mutual trust, good neighborliness, and cooperation. Additionally, the book addresses three fundamental issues: security threats and the development of security mechanisms; energy security challenges and energy system development; and the enhancement of trade, investment facilitation, and regional economic cooperation. This book is an engaging read for scholars specializing in political, economic, security, and cultural research on Northeast Asia, as well as policymakers and strategists focused on China's foreign policy and diplomatic efforts in the region. China's Maritime Security Strategy Edward Sing Yue Chan, 2021-09-09. This book examines the evolution of China's maritime security strategy and questions what has made China shift from a constrained to a more assertive strategy. Historically, China has not been an active player in maritime security, but in recent years, Beijing has begun to pursue policies and measures to safeguard its maritime rights and interests in the Indo-Pacific region. This growing influence in the region has become a concern for other countries about what kind of sea power China is developing. This book seeks to address this concern by providing an overview of the development of China's maritime security strategy from the era of Deng Xiaoping to Xi Jinping. It suggests that while the involvement of maritime actors and the development of naval capability have provided the depth to the strategy, the national strategic guidelines from each generation of Chinese leadership have determined the overall direction of the maritime security strategy. After 40 years of development, China has established a set of priorities for its maritime agenda: territorial integrity is at the top, followed by development, and then regional and international maritime cooperation. These findings help us to understand China's multidimensional maritime power as being both assertive and cooperative. This book will be of much interest to students of naval strategy, maritime security, Chinese politics, and International Relations. *Public Policy and Private International Law* Meyer, Olaf, 2022-09-06. The public policy exception in private international law is designed to provide a national backstop in the application of foreign laws. This book provides detailed and practical comparative coverage of the use of public policy in the context of private international law across a number of important jurisdictions spanning three continents.
